O. E. Feld

Dear Mr. Feld:

We are in receipt of your application to appropriate the public waters of the State of Idaho. However, upon reviewing your application it appears we will require some additional information before we can continue processing.

You have shown the point of diversion to be in the SW $\frac{1}{4}$ of Section 16, Township 5 South, Range 31 East, Boise Meridian, Bingham County. We now must know which 40-acre tract in the SW $\frac{1}{4}$ the well will be located in. Even if the well is to be located near a center line, it must be identified to a particular 40-acre tract.

The quantity of water you have requested under Item 4, is excessive, as indicated by the Idaho Statutes. The statutes provide for a maximum of .02 cubic feet per second per irrigated acre. Therefore, the 115 acres you propose to irrigate would require a maximum of 2.30 cubic feet per second. If your soils were such, that upon a showing satisfactory to the State Reclamation Engineer, that your soils required additional water, the Department then could allow additional water. However, you must justify the additional quantity. If you would accept the maximum provided for in the statutes of 2.30 cubic feet per second please advise us by return mail.

We also recommend that under Item 7a, you request the full 5 year period for development instead of the one year you have listed, which gives you the benefit of additional time for your project completion.

The lands you have listed under Item 8b of the application, being the NW $\frac{1}{4}$ NW $\frac{1}{4}$, and the W $\frac{1}{2}$ SE $\frac{1}{4}$, do not correspond with the map you have listed. The map would indicate that all the land is in the SW $\frac{1}{4}$ of Section 16. If you could confirm your land list we will be glad to

35-7102

make the necessary changes under Items 8b and the map, Item 11.
