RE: Claim to a Water Right

Dear Mr. Isaak:

In June of 1983 our office receipted a claim to a water right from the Aberdeen Springfield Canal Co. for the use of groundwater since October, 1934. After reviewing the claim there are a couple of items I feel the company should address.

Examination of a USGS quad map indicates the well is just south of Aberdeen adjacent to the Low Line Canal. This would mean the well could only provide supplemental water to a portion of the lands within the company's service area. However, the claim states the place of use as lands under the entire system and does not provide a legal description for any of the place of use. Without the legal description for the actual place of use, the claim is incomplete.

It would certainly benefit the company and enhance the value of the claim if the place of use were to include a legal description of the land receiving supplemental groundwater and the number of acres irrigated in each 40 acre subdivison. Though the claim would have to be amended to include the description, there is no cost to the company.

In support of the claim, the company should consider furnishing notarized statements explaining the reason for using the well just during the month of July. The company could also provide certified copies of documents or affidavits as evidence confirming the well existed in 1934 and was in use.
