Dear Mr. Wilde:

In the process of completing your application for transfer on water right No. 35-7167 and 35-2761, it is necessary to check ownership of the right and/or land from which the water is transferred. In each transfer application there is a reference made to "paragraph No. 10 of attached contract." I am unable to locate any attached contract.

To continue processing of your applications for transfers, it will be necessary for you to send me a copy of the warranty deed for the SW $\frac{1}{4}$, Sec. 4, T. 3N, R. 36E and to send a copy of paragraph No. 10 of the contract indicated in your application.

If I can assist you in clarifying this request, please call me at 525-7161 or come to the Idaho Falls Office. Please send the requested information to:

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

Dear Mr. Farnam:

We have received your letter of January 5th concerning change of ownership of Licenses G-31920/35-2741 and G-32248/35-2761. Both of these documents are licenses and we have no procedure for changing the ownership of a license with every change in ownership of the land. The Idaho Attorney General's office has indicated that a water right license is appurtenant to the land described in the license. Therefore, the owner of the property would also become the owner of the water right license. If the property is divided according to the descriptions contained in the licenses, the division would automatically occur. Your letter will be entered into the files as information regarding ownership, but the licenses cannot be changed.

You also mentioned Permit No. G-32248 which, as noted above, has been renumbered to 35-2761. A license was issued on this permit on November 30, 1970, and, therefore, nothing further is required.

If you have any further questions regarding the above matters, please contact us.

Re: Avon Wilde and Elmer G. Wilde, d/b/a Wilde Brothers,
a co-partnership, Water Licenses No. G 31920 and
35-2761

Dear Mr. Higginson:

We are writing as attorneys for Elmer G. Wilde and Avon Wilde who have been in operation as a partnership. The Wildes have decided to divide the partnership lands and operate individually. They currently hold the above mentioned Water Licenses. Water License G 31920 apparently still remains in the name of Reid R. Parkinson. The Wilde Brothers' partnership purchased the property and Water License from Mr. Parkinson. Enclosed is a copy of the Deed and Bill of Sale setting forth this transfer. Apparently, your records do show the License in the Wilde brother's names since they have received communications in that regard.

As part of the division of the partnership lands, it is the desire of the Wildes that Water License No. G 31920 now stand solely in the names of Elmer G. Wilde and Deanna Wilde, his wife. It is also the desire of the parties that License No. 35-2761 now stand solely in the names of Avon Wilde and Gloy Wilde, his wife.

If it is necessary for the Wildes to fill out any departmental forms to accomplish this purpose, we would appreciate it if you could forward them to us. If this can be

35 2761

accomplished by letter, please set forth the appropriate change in your records. In addition, please let us know if you wish copies of the Deeds setting forth these conveyances of land together with the respective Water Licenses.

The Wilde Brothers currently are involved with one other application involving Permit No. G 32248. Apparently the proof of application of beneficial use and subsequent issuance of the License on this property will take place during 1972. We presume that it would be easier to make the License on this Permit in the name of the partnership. This would especially seem logical in view of the fact that the contract to this property is now in escrow with the Deed to be received by the partners also during 1972. After the Deed comes out of escrow in the name of the partnership and after the License is received, both in the partnership's name, we could proceed to division of the water right into each brother's share. Please let us know if you feel this would be the appropriate manner of handling this particular situation.

Thank you for your assistance in this matter.

Yours very truly,

Robert E. Farnam

Re: Permit No. 35-2761 (G-32248)

Wilde Brothers
Route 1
Roberts, Idaho 83444

Gentlemen:

Please be advised that our field examiner has conducted an examination of the land and works covered by your above numbered permit. His report indicates that you are diverting 3.87 cubic feet per second of water from a ground-water source within the SE $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 5, T. 3 N., R. 36 E., B.M., Bonneville County. The amount of water that can be recognized as beneficially used under Idaho law is 3.87 cubic feet per second. The maximum quantity of water diverted shall not exceed 1,120 acre feet per season. Your Water License will be issued for irrigation of 320 acres within a gross area of 467 acres. The number of acres that can be allowed as the place of use under a water license is limited by the original permit. Since your permit was originally issued for use of water on only 320 acres, we can only allow the water license for the irrigation of 320 acres. The 467 acres you are irrigating is located within the S $\frac{1}{2}$ Sec. 5; SW $\frac{1}{4}$ Sec. 4, T. 3 N., R. 36 E., B.M. The priority date you have established is February 23, 1965.

If you wish to have the additional 147 acres fully covered by a permit, you should file a new application for a permit to cover this acreage. We are enclosing an application for permit form for your use in this matter. You should be aware that you are required by law to have a valid permit on the additional 147 acres if you intend to continue irrigating them.

A licensing fee totaling \$29 must be received within 30 days of the date of this letter, in order that we can issue you a water license as set forth in this letter.

Very truly yours,

Dear Mr. Holden:

We are in receipt of your letter of November 21, 1967 on the above referenced permit.

Please be advised that the amendment in question was approved with the understanding that no more water would be required to irrigate the 480 acres than would normally be required to irrigate 320 acres.

Presently, under 42-211 there exists no provisions to increase the quantity of water originally appropriated in a permit. Therefore, if you require additional water to irrigate your 160 acres of ground, it would be beneficial for your client to file a new permit covering any additional ground with a new appropriation and a new priority.

We are enclosing an application for permit form for your use in this matter. Please contact us if we may be of further assistance.

Re: Wilde Brothers
Permit No. G-32248

On June 28, 1967, the State Reclamation Engineer approved an amendment to Permit G-32248 to include an additional 160 acres of land. On reading the Notice of Proof of Completion of Works and Application of Water to Beneficial use, we note that it still calls for the diversion of 6.4 c.f.s. of water. We are wondering if the Notice should not show 9.6 c.f.s. to provide an inch to the acre for the 480 acres in the permit.

Any information you may give us will be greatly appreciated.
