Dear Sir:

On Friday I completed the water filings of Frank Ueda- and of Clements and Jackson & Tophill Farms--I came to work this morning and looked again at the calendar and it is only the 13th--I notarized these papers in good faith and the people involved all came in on Friday to sign these papers--it was absolutely an error on my part of picking up a daily reminder one week prior to when I was supposed to have completed the filings.

What can I do to correct the error of notarizing these a prior week than was called for? I have correct dates on the proofs--only I done the work one week in advance. I called the people and made sure they would come here on Friday and completed them as if it were Friday March the 17th.

I know it will be hard to believe such efficiency exists--but it is very truthful--I looked at the wrong week on the daily reminder and completed this Fridays work one week early.

Gentlemen:

The date for proofs of Completion of Works and Application of water to beneficial use as set out under terms of Permit No. G-30411 are due not later than March 20, 1967

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated - - all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Very truly yours,

STATE RECLAMATION ENGINEER
