RE: Permits G29528, G29529

Ashurst & Taylor Inc.
P. O. Box 117
Jaan, Idaho

Gentlemen:

Proofs have been made on both of the above numbered permits. On February 3, 1965 you were notified that receipt of the proofs were acknowledged and that before final action can be taken in the matter, the law requires that a field examination be made by an examiner from this department. At the present time we have only one examiner and cannot tell the exact time the examination will be made, he will try and contact you at the time he makes the examination so arrangements may be made.

Very truly yours,

CARL E. TAPPAN

Re: Water Permit

Sec. 32, Twp 3N., Range 37 E.B.M.

State of Idaho
Department of Reclamation
State House
Boise, Idaho

Gentlemen:

My permit to appropriate subteranean waters on section 32, Twp 3N., Range 37 E.B.M., has been lost. I cannot locate any correspondence concerning this water right.

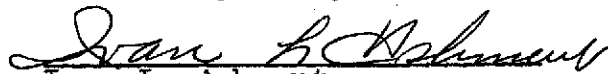

My records show that this permit was No. G-29529. Will you please check this for me, and send me a copy of my permit.

I understand that section 32 was partially irrigated under water license no. G. 22454, issued to J.W. Hays. - P6050

When I purchased section no. 32. from the J.W. Hays estate there was no water right with it. Permit no. G. 22454 was to be transferred to another portion of the Hays holdings. Please send me the necessary forms to have this water right taken from section 32, so that my water right can be for the full ammount per acre.

Thank you.

Yours very truly

Ivan L. Ashment.

Gentlemen :

We enclose Permit No. G-29529 in which we direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

We also enclose Departmental Receipt No. G-5731 which was issued covering payment in the amount of \$8.00 for the filing fee of the above mentioned permit.

You will note, under Question 10, that we have changed the required time for completion of works and complete application of the water to the proposed use to five years. However, you may make the required proofs at any time you are prepared to do so within that time.

Section 32 is partially irrigated under Water License No. G-22454. The amount of water which can be licensed under this permit plus the proportionate amount of water under No. G-22454 cannot exceed one miners inch per acre of irrigated land.

Very truly yours,
