RE: Application for Permit

Dear Applicant(s):

The Department of Water Resources has received your water right application. Preliminary review of the application indicates that it is incomplete and cannot be accepted for processing. We are returning your application to allow you to complete the necessary items. The required information is described below.

The Nature of Proposed Use was not provided correctly. If you are having a fishing pond, is the pond for recreation or is it for fish propagation?

RECREATION

The Water Supply – Is this or these (3) ponds on stream or off stream? If they are on the stream, you will need to contact the Idaho Dept of Fish and Game.

OFF STREAM

The Description of Diverting Works was not provided correctly. You gave us the height of the dam and the acre-feet, but we still need to know the depth or average depth of the pond along with the surface area of the pond in square feet.

5
5000 sq ft

The Place of Use was not provided correctly. We must know exactly where the pond or ponds will be located, by Township, Range, Section and the 1/4 1/4 's.

Town 19 N Range 23 E Sec 30 SW 1/4 of NE 1/4

The use or purpose of the fish pond must have a recreational storage volume. So where you have listed Fish Pond for .1 cfs, you need to list Recreational Storage with an acre feet per annum.

.5 A/FT

Please feel free to contact this office and talk to a Water Right Agent if you have any questions.

Sincerely,

Sharla Cox
