

MEMORANDUM

TO: Application for Permit 72-16601 File

FROM: Corey Skinner

DATE: July 11, 2006

SUBJECT: Conversation with Applicant

This day I spoke with Tait Johnson regarding his application. He asked for additional time (until July 31st) to submit the additional information asked for in the Department's June 23rd letter. I granted him the additional time, essentially extending his deadline. A couple of other items of note during our conversation relate to the fact that the well described on the application has apparently been drilled since the application was originally filed and that Mr. Johnson's address and phone number(s) have changed (see correspondence in file).
