Mr. Allen Merritt

04/15/2002

The attached copy of Pomerelle log sheet is for the year 2001. This I generated off of their sheets, which I have included for your review. The year 2000, I have yet to post. Instead of running three or four months out of the year they are operating the full 12 months and when they have run out of their 60,000 gallon storage, they then request a refill for FIRE PROTECTION, as a Watermaster and a water right user, I feel they are no differant then anyone else as to fire protection and I have received this complaint from others that are aware of the Liability that was presented in your data submitted May 31, 2000. I do feel the engineering specks that were submitted to your Department on the Pomerelle expansion does need to be reviewed.
