Dear Mr. Steinke:

Returned herewith are the two applications for permit with attached check for \$11.50 which were received in this office March 9, 1960, and two blank forms.

Your letter indicates you want to file individual applications instead of two applications in both names, and that you would file on 480 acres lying on the west portion of Section 1. The west half is 320 acres.

Divide the number of miners inches by 50 to obtain the number of cubic feet per second. 320 miners inches equals 6.4 cubic feet per second, for which the filing fee is \$6.50. You indicated on the back of the form that you knew how the fees are computed, but didn't understand the relation between miners inches and cubic feet per second.

On Page 2 of the application under paragraph 13, you show the well location. That question refers only to existing rights before the application is filed. The remarks are already shown under 7 and 8 and do not need to be repeated.

Very truly yours,

GEO. M. CARTER

RE: Application for Permit

E. J. & Leonard Steinke
802 Skyline Drive
Idaho Falls, Idaho

Gentlemen:

We acknowledged receipt of your two applications for permits and wrote you March 9 requesting additional fee of \$2.00 for the two permits; or the two permits can be combined in one application and \$3.50 would be refunded.

We also asked if there are any existing water rights on the land in order that the applications can be completed.

Neither application has been approved and no date of priority has been established as the fees with the two applications were insufficient.

Kindly advise at your earliest convenience.

Very truly yours,

GEO. N. CARTER

Re: Applications for Permits

E. J. Steinke & Leonard Steinke
802 Skyline Drive
Idaho Falls, Idaho

Dear Mr. Steinke:

We acknowledge receipt of two applications for permits with one check for \$11.50 signed by Leonard J. Steinke. Each application claims 320 miners inches of water to irrigate one-half section in both names. The filing fee for each application is \$6.50, or \$13.00 for two applications.

One application may be used, claiming 12.8 cubic feet per second or 640 miners inches, showing both points of diversion to irrigate 640 acres. The filing fee for 12.8 c.f.s. is \$8.00.

We have changed the name Leonard Steinke shown as name of one of the applicants to Leonard J. Steinke to agree with the signature.

The time allowed for completion of works and beneficial use of the water has been changed to 5 years. The proofs can be made at any prior time.

Is there any existing water rights on any part of Section 1?

Kindly notify us at your earliest convenience your wish in regard to above explanation and answer the question above.

Very truly yours,

GEO. M. CARTER
