Dear Mr. Croft:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the POST-REGISTER, all submitted in proof of completion of works and beneficial use on Permit No. C-29328.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

RE: Permit No. G-29328

William M. Croft
Rt 1, Box 31
Idaho Falls, Idaho

Dear Mr. Croft:

In processing your beneficial use and completion of works proofs for the above referenced permit we find you have included additional land not covered in the permit, i.e., the NE~~1~~SE~~1~~, SE~~1~~SE~~1~~, NW~~1~~SW~~1~~, and SW~~1~~SW~~1~~, Sec. 9, T. 3 N., R. 36 E., B.M. Since we did not receive any amendments to the permit this land cannot be listed on the proofs.

It is possible to amend the permit to include this additional acreage, however, you cannot claim any additional water under the permit. The proofs would have to be taken over and the permit readvertised at your expense.

You may file a new permit requesting enough water to cover the additional ground using the same point of diversion. Your present permit calls for 9.6 c.f.s. and you state the works are capable of producing 12.8 c.f.s. So it seems this is the more favorable solution to the problem.

Please let us know your desires in the matter. If you want to amend the permit we will send you the required forms, and likewise if you want to file a new permit.

Very truly yours,

Attn: Robert W. St. Clair

Dear Mr. St. Clair:

The application for 5.02 c.f.s. from well in NE¹/₄NE¹/₄, Sec. 15, to irrigate all of Sec. 15, T. 3 N., R. 36 E., B. M., can be processed.

The application for 3.2 c.f.s. from well in SE¹/₄SE¹/₄, Sec. 7, to irrigate E¹/₂SW¹/₄, SE¹/₄, Sec. 7; S¹/₂, Sec. 8; W¹/₂SW¹/₄, Sec. 9, T. 3 N., R. 36 E. will have to be changed. Permit No. G-29328 claims 0.02 c.f.s. per acre for above land excepting the E¹/₂SE¹/₄, Sec. 8 and W¹/₂SW¹/₄, Sec. 9. The land must be reduced to cover that land not in the old permit without the full water right. This is on the assumption that Mr. Croft is presently diverting at least 9.6 c.f.s. from the well. Kindly advise in regard to present capacity of the pumping plant.

A prompt answer will insure both applications being processed at the same time.

Very truly yours,

RALPH W. THOMAS, Deputy
State Reclamation Engineer

Re: Permit No. G-29328

Dear Mrs. Rule:

I am herewith enclosing request and form for publication in connection with this further permit.

Believe if you mail this right out it could still be published in the issues of September 5, 12, 19 and 26.

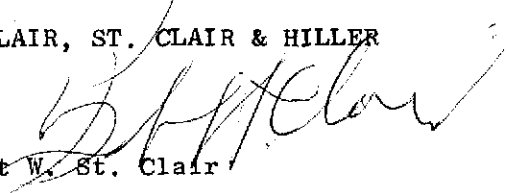

I just found out about this permit last night after I had mailed the material with regard to permit G-32385.

If you feel that you cannot get the notices back to the paper in time, you could eliminate the publication of September 5 and substitute October 3; therefore, we can still have the hearings on the 6th of October. If there is not sufficient time, the hearing could be on October 13.

Thanking you, we are
