	<u>REMARKS:</u>		Applicant also owns the 80 acres immediately to the South of the lands described herein. It is his plan to use the existing Aberdeen Springfield Canal Co. water rights to fully irrigate the 80 acres and to partially irrigate NW ¹ / ₄ , Sec. 13 and use the water herein applied for to supplement the irrigation of the NW ¹ / ₄ and is to be done through the ditches presently existing on said premises. It is then his intention to sell the 43 shares of Rockford Pump Company stock since it is not beneficial to the applicant; Rockford Pump water is taken from Aberdeen-Springfield Canal and applicant's lands are too high to be successfully irrigated therefrom. Quite frequently the present water rights appurtenant to these lands are cut back late in the season and are not sufficient to properly irrigate.

Dear Mr. Jensen:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the Blackfoot News, all submitted in proof of completion of works and beneficial use on Permit No.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.
