Dear Mr. Tiede:

Our field engineer's report on his inspection of the completion of works and application of water to beneficial use under the terms of Permit No. G-26739 shows the well located in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 29, Township 7 South, Range 29 East, B.M. and that it is capable of conveying 122 miners' inches (2.44 c.f.s.) of water for irrigation of 240 acres. Dear Mr. Tiede:

We acknowledge receipt of your application for Permit to appropriate the Subterranean Waters of the State of Idaho from a well. In the application you say that you are filing on 1500 gallons per minute. We can allow you under this permit up to 2154 gallons per minute, figured at the rate of one miner's inch per acre. However, we assume your pump is only pumping 1500 g.p.m., which would be equivalent of 3.37 cubic feet per second or 168.5 miner's inches.

We are returning your check for \$5.50 and request you to substitute it with one for \$5.75. Providing you wish to file on 1500 g.p.m. or 3.37 cubic feet per second the fee is \$5.75. However, if you wish, you could file on 4.0 cubic feet per second for the same fee of \$5.75.

Upon receipt of your check for \$5.75 we will then process your application and return it to you as a Use Permit.
