This acknowledges the depositions of Holder and two Witnesses and the Affidavit of Publication in The Daily Bulletin in proof of completion of works and beneficial use under Permit No. G-25239.

Before a permit is licensed, the law requires that a field examination be made by an engineer from this department. At this time we cannot say just when this will be made but our field engineer will contact you prior to the time he is to make the inspection so that you can arrange to accompany him.

Since your residence is in California and you may not be in Idaho at the time inspection is made, please send us the name and address of the person who will be accompanying the engineer. He will be then be notified of the time.

Department of Reclamation

Comes now Herman L. Hauck and represents to the State Reclamation Engineer of the State of Idaho:

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. G 25239.

That the point of diversion is described in said permit as being located NE¹SE¹, Section 5 Twp. 3 So., Range 32, E.B.M.

That he now requests that the point of diversion be changed to a point located NW¹SE¹, Section 5, Twp. 3 So., Range 32, E.B.M.

That his reasons for desiring to make such change are as follows:

That said well, being the point of diversion, was actually drilled in the above location rather than as originally shown on the permit

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.

Signed at Blackfoot, Idaho, this 4th day of June, 1958

Herman L. Hauck
