Ques. 4. State source of water supply, place of diversion, and describe works for con-
veying water from point of diversion to place of use.

Ans. Well, 14-inch diameter, about 50 feet deep, cased 30 feet to lava,
located in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Sec. 10, Twp. 4 So., R. 33, E.B.M. Ditches run
from the well over the lands described in the permit, as shown on the
permit map.

Ques. 5. How many second feet of water do you estimate said works will safely con-
duct to place of use, and how much water have you seen being so conveyed?

Ans. Approximately 110 miner's inches, or 2.2 second feet.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons
per minute have you seen the pump deliver, and how did you measure or estimate the
amount?

Ans. I estimate from long experience with irrigation water, that the
pump delivers and discharges into the ditch about 110 miner's inches
of water. I have seen the full flow used for irrigation of the lands
described in the permit in 1954, 1955 and 1956.

24908

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water is all used for irrigation of the lands in Sec. 10, Twp. 4 So., R. 33, E.B.M., as follows: NW $\frac{1}{4}$ SE $\frac{1}{4}$ -30 a; SW $\frac{1}{4}$ SE $\frac{1}{4}$ -30 a; SE $\frac{1}{4}$ SE $\frac{1}{4}$ -30 a. Besides pump, motor, ditches, etc., there is a dwelling house, barn, box car sheds, and entire tract fenced.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. ---

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Land is of lava ash soil. It requires an inch of water per acre for proper irrigation.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. None.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have seen the entire flow from the well used for irrigation of the above lands since 1954. In addition, the well was used with a smaller pump, and with lesser flow since 1947.
