Attention: A. W. Brunt

Dear Mr. Brunt:

In reply to your letter of May 23, 1958, in connection with the above captioned permits, you state under Permit No. G-24000 that you have completed your well and you have been waiting for the installation of the pump and water system. You stated that this was completed yesterday and the sprinkler system is now in operation. You request to know what additional you need to do to re-instate this permit.

Permit No. G-24000 was filed on February 3, 1953. The maximum of five years was given you for Completion of Works and Application of Water to Beneficial Use, said proofs being due April 23, 1958. Under date of May 21, 1958, we mailed you a form letter giving you 60 days to show cause why said permit should not be cancelled. Since you have the works under said permit completed and providing you return your publication notices, allowing four weeks for publication, will still give you plenty of time to get your proofs in to this department prior to the 60 day time limit. Otherwise it will be necessary for you to file a new application for permit.

Relative to Permit No. G-24001, you state that you have been unable to complete a well for beneficial use of water and wish to know how long an extension you may be given. According to the records in this department, said permit was filed February 3, 1953. Completion of Works Proof and Beneficial Use Proof were due April 23, 1958. Since we have allowed you the maximum term of five years to complete said well and apply the water to beneficial use, no extension of time can be granted.

Your only other alternative would be to file a new application for permit.

Very truly yours,

Dear Mr. Merrill:

We regret that it is again necessary for us to return the application of the Brunt Real Estate and Investment Company for certain corrections.

You will note that the sketch map includes all of Section 9, which is not listed under Question 12, and we are at a loss to know whether or not this should be included.

Question 13 should also be answered.

Very truly yours,

Dear Mr. Merrill:

We acknowledge receipt of your letter of February 2, 1953, enclosing applications of Brunt Real Estate and Investment Company and George Brunt for permits to appropriate underground water; also your check for \$24.75.

We are not able to reconcile the location of the wells and the land to be irrigated as given in the applications and as shown on the sketch maps as we return same herewith in order that this matter may be clarified.

The application of the Brunt Real Estate and Investment Company gives the location of the wells as in the center of Sections 4, 9, and 8, and also in the extreme Southeast corner of the SE $\frac{1}{4}$ of Section 4. We have made a plat showing the location of the two wells in the center of Sections 4 and 9, and the location of the other well as nearly as we could get it from the sketch map which you enclosed.

From this it would appear that this well is located either in the Southwest corner of the SW $\frac{1}{4}$ SE $\frac{1}{4}$, or the Southeast corner of the SE $\frac{1}{4}$ SW $\frac{1}{4}$, or possibly on the line between the two. Please indicate if the land cross-hatched (which is as shown in Question 12 of the application) is correct, and show the exact location of the wells.

The application of George Brunt locates the wells as in the center of Sections 11 and 12 and in the NW $\frac{1}{4}$ of Section 7, and NE $\frac{1}{4}$ of Section 13. The sketch map we have prepared shows the location of the third well and the fourth well as indicated in the application, but that is not a definite enough description. Please locate these two wells on the sketch map to a 40 acre subdivision. Also please indicate if the land cross-hatched (which is as appears in Question 12 of the application) is correct.

The correct filing fee on the Brunt Real Estate and Investment Company application is \$12.25, and on the George Brunt application \$13.50, or a total of \$25.75. Since your check is for \$24.75, there is a balance of \$1.00 due.
