Dear Mr. Wood:

We have your letter of June 22 and regret exceedingly that the notice of cancellation was sent you on the above numbered Permit in the name of yourself and J. William Jones. Our records clearly show that your proofs of completion of work and beneficial use were made and the matter is only awaiting inspection and report by our field engineer.

Until this has been done, no record is made on our copy of the Permit and for that reason we overlooked the fact that your proofs had been submitted.

Please accept our apologies.

Dear Sir:

Your letter of June 17 (Form 24) has been received, and we do not understand why our permit should be cancelled. We completed what we understood is required last summer, and have used the water from the well for irrigation on both farms. We surely would like further information concerning what we must do to complete the works.

In your letter of February 4, you stated that the field engineer must inspect the works. If he has made his inspection, we did not know of it, and desire to know what we must do to complete this project. We certainly do not want our permit cancelled and are most anxious to do what is necessary for completion of these works.

May we hear from you at once stating what more is required.
