Dear Sir,

Recently I was given a permit to appropriate the underground water on my place for irregation purposes. As my application (no.31379) (permit no.23608) states this said water would be taken from a well located in the center of W $\frac{1}{2}$ Sec.12 Twp.3S Rge.32E. This well to produce 6.4 Cubic feet per second. Under the advisement of pump and irregation specialists, it is advised that I put in two (2) pumping units, located in the center of each $\frac{1}{4}$ Sec. instead of the $\frac{1}{2}$ Sec. Therefore I would like to have said application changed to read 3.2 cubic feet per second on each of centers of each $\frac{1}{4}$ Section. This would give me the same amount of water on the $\frac{1}{2}$ Section but would be divided between two pumps instead of all from the same pump.

Please advise me as what can be done on this matter or if it would make any difference. Enclosed is map as proposed. Thank you.

Sincerely,

Francis J. Webb

Dear Mr. Hamilton:

We are enclosing herewith for Mr. Francis J. Webb, Form 20 being an application for transfer of water right.

This form is apparently designed for several purposes. Our purpose in this instance is to transfer all of the water allowed by the above license to the lands in the SW $\frac{1}{4}$ of Sec. 12, T. 3 S., R. 32, EBM.

The S $\frac{1}{2}$ of the NW $\frac{1}{4}$ of said Sec. 12 has been sold to a Mr. Neil Williams, who we believe has filed a new application for a water permit to irrigate those lands and other lands from a new well to be constructed by him.
