Dear Mr. Gamble:

The Department is presently processing your application for permit No. 35-7598, application for transfer No. 35-2295, and your claim to a water right No. 35-4048. In further checking our records, we find that there is an existing license No. 35-2214 covering the N₂ of Section 30. Because we were unaware of this license and it was not properly recorded in our records at the time you inquired about your water rights, there are some errors that now need to be corrected in your application and claim to a water right.

If you are planning a trip to Idaho Falls in the near future, we request that you stop in our office and again discuss your water rights and the changes that need to be made to get everything in order.

Very truly yours,

Dear Mr. Kerr:

In writing you yesterday in regard to proofs on Permit No. G-23587, we overlooked the fact that both proof of completion of works and beneficial use are due at the same time and therefore we cannot accept proof on Form 6 which you submitted. If Mr. Inouye is prepared to make both proofs, the notice should be made in duplicate on Form 36 enclosed. Both copies to be returned to this department together with Form 11.

However, these proofs are not due on this permit until January 30, 1954, although they can be made at any earlier date.

Re: Permit No. 20335
Permit No. 023587

Gentlemen:

I have been asked to follow through with whatever is necessary to complete the proofs in connection with the above numbered applications now held by Umeno Inouye regarding which you have had some correspondence with the Peoples Real Estate Co. as well as with Umeno Inouye. It appears that there has been some confusion and misunderstanding regarding the references to the two permits. A brief history of the transactions may assist us in proceeding further. As I understand it, Mr. Kiefer and Mr. Getty made the original application for Permit No. 20335 describing only one well. The first well did not produce sufficient water and the second well was drilled to supplement the first. The two wells produced only enough water for the Southeast quarter of Section 25, Township 2 South, Range 33 E.T.M. The properties were then purchased by Inouye and application was made for Permit No. 023587 to cover not only the Southeast quarter of the Southwest quarter of said Section 25 originally described in Permit No. 20335, but also an additional 40 acres to-wit: The NE $\frac{1}{4}$ SW $\frac{1}{4}$ of said section 25. This permit was granted and this well completed and equipment installed.

I understand that proof of completion of the two wells has already been completed under Permit No. 20335 but was held up for an amendment as to the point of diversion. I have had such an amendment prepared and signed and enclose it herewith.

To clear up the question of the other 40 acres, I have added a notation that other arrangements are being made for the irrigation of the SE $\frac{1}{4}$ SW $\frac{1}{4}$ of said section originally described in the above mentioned permit. I assume that with this amendment the original proof of completion of works submitted will now be sufficient. If not, please let me know.

23587

Since it is now also desired to make proof of application to beneficial use under Permit No. 20335, I am also enclosing Form 10 prepared in duplicate and Form 11 authorizing publication. I have set the time for Tuesday May 19, 1953, so that the first publication can be made on April 24th allowing us a little time if there are any other matters to be cleared up prior to the commencement of this publication.

With regard to Permit No. 023587, we are prepared to submit proof of completion of works and unless other forms are required, I will use Form No. 6 which was sent out with your letter of April 4th. If other forms are required, will you please forward them directly to me with any necessary instructions for their preparation.

If anything further is required to clear up the status of these two permits at this time, please advise me by return mail.

Yours very truly

Robert M. Kere, Jr.
