Re: V. F. Wootton - Permit No. G-23383

Dear Mr. Kulp:

In connection with the final proof under the above numbered permit, it was called to our attention today that there is an error in the description in the Notice of Proof which was published by The Daily Bulletin. The description should read "Range 36 East" rather than Range 32 East.

In view of this error and in view of the fact that it was our mistake, it will be necessary to re-publish the Notice and at our expense. In order that we may make proof before December 17, 1955, it will be necessary that re-publication commence November 18, 1955. Therefore, if it is at all possible, we would recommend, and this will be your authorization to prepare another Notice of Proof exactly the same as the first one, which is returned herewith, with the exception of making the change in the description in Paragraph 4 and change the date of submission of proof from that stated in the original Notice to read "ten o'clock A.M. on the 13th day of December, 1955", and this will be your further authorization to have it published at our expense.

We trust that this can be handled as suggested above but, if for any reason it cannot, please immediately forward the necessary forms.

Very truly yours,

ANDERSON & BEEBE

He is the owner and holder of Permit to Appropriate the Public Waters of the State of Idaho No. G-23383

Under the terms and conditions of said permit, construction work thereunder was required to be completed by December 17, 1954

That he has heretofore performed the following work described under said permit

The well has been drilled, a 20 horsepower pump and motor set in place and water has been applied through ditches to approximately 20 acres of the lands described in the permit,

costing $ Approx. $3,500.00.

That he is unable to complete the remainder of the work within the required time, for the following reasons, to-wit:

That the remainder of the land is extremely rough and covered with a heavy growth of trees and brush requiring a greater expenditure of funds and a greater length of time than anticipated for proper cultivation, that said additional work is now partially completed and water will be applied thereto during the irrigation season of 1955.
