Dear Sir:

We were very much surprised to receive a notice that our Permit No. G 23123 had not been completed. We had rushed to get the wells completed before October 21, 1957. We had turned it over to Mr. Tom Sparks here in American Falls. It had been published in the Fower County Press in October 1957 and we thought that Mr. Sparks had completed it. It is a great disappointment to us to find now that it wasn't done.

We cannot afford to have this Permit cancelled after putting so much money into the wells.

We will look into the matter here today to see why it was not completed as we had thought.

Sincerely,

Ferdinand Gehring

Dear Mr. Gehring:

We return your application for permit to appropriate 9.6 cubic feet per second of water from subterranean flow for the following corrections:

From information given on the sketch map, we have taken the liberty to state the correct points of diversion, as it is necessary that the well location be given within a 40 acre subdivision.

We also assumed from your map that the entire 480 acres are irrigable and have so stated under Question 12.

Please answer Question 13.

We return your check for \$7.09 with the request that you substitute for it one in the amount of \$7.25, the correct filing fee, which is at the rate of \$5.00 for the first second foot and 25 cents for each additional second foot or fraction thereof.

Dear Mr. Gehring:

In reply to your letter of September 20, 1952, we enclose two forms of application for permit to appropriate subterranean water, together with a pamphlet giving regulations and instructions in regard to filing same.

If the water from both wells is to be used on the same land, one application will be sufficient, and under remarks show the location of both wells. However, if each well is to irrigate different land, separate applications should be filed.

When this application is approved, it will be signed by the proper State Officials and sent you as a use permit under which you may proceed with the construction of the work described in the application.

In order to complete your water right, proofs of completion of works and application of the water to beneficial use are required. The time required for making these proofs should be indicated under question 10.

Very truly yours,
