Dear Mr. Judge:

I have asked the adjudication staff of the Department to look into your water right situation and the conversation we had last week at the information meeting in Aberdeen. This appears to be the situation:

You apparently have a center pivot irrigation system served by a pump from the canal. Next to the pivot field is another field which is served by a well under claim A35-02226. This second field also has some irrigation company shares, but you do not presently use canal water on it for irrigation purposes. If this is the case, we are unable to recommend that the field is served by water rights from both the well and the canal. This has apparently led to your concern that we may not be allowing you the flexibility to use the canal water to add to the well water.

We cannot do so because that is not, in fact, the way you are actually using the water. If, in the future, you should design a delivery system to get the canal water to this land also, changes to the canal company water right(s) may be possible to authorize the water use. This recommendation has no effect upon your ability to retain ownership of the canal shares.

If I have misunderstood your concerns, or we do not have correct information, please let me know.

Sincerely,

A handwritten signature in cursive script, appearing to read 'R. Keith Higginson'.

Dear Mr. Judge:

The report of our field engineer on examination for completion of works and beneficial use on your Permit No. G-22827 shows that you have irrigated 120 acres of land in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ and SE $\frac{1}{4}$ Section 1, Township 4 South, Range 32 East, B.M. and the W $\frac{1}{2}$ SW $\frac{1}{4}$ Section 6, Township 4 South, Range 33 East, B.M. from your well in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ of said Section 1.
