Dear Mr. Good:

We acknowledge receipt of your letter of November 8, 1951, returning corrected depositions of witnesses in connection with beneficial use proof under Permit No. 21722.

We note your statement that there is no snow in that vicinity and an inspector could ascertain the acreage irrigated at this time. However, it is not entirely a question of checking acreage irrigated, but such inspection includes a complete measurement of the well, pump, etc. We assume that the pump is not operating at the present time and for that reason, inspection would have to be postponed until next spring.

Very truly yours,

Gentlemen:

Complying with the request contained in your letter of November 7, 1951, I am returning to you herewith the Deposition of Witnesses, E. R. Harrington and William M. Heaney, with the requested data shown in the answer to interrogatory No. 7.

There is no snow in this vicinity and if an inspection could be made at this time, the inspector could readily ascertain the acreage which during the year 1951 was devoted to the production of agricultural crops.

Mr. Donald R. Good

Dear Mr. Good:

We are in receipt of your letter of November 3, 1951, enclosing depositions of Irvin A. Satterfield and two witnesses, also affidavit of publication in the Aberdeen Times, all submitted in proof of beneficial use under Permit No. 21722.

Question 7 of the depositions of the two witnesses should give the legal description of the land where the water has been used, and we return same for such correction.

Also in reply to that portion of your letter where you request the final certificate at the earliest possible date, will state that before final action is taken the law requires a field examination by a field engineer from this department, and since it is now so late in the season, it is probable that such an inspection will not be made before next spring.

Dear Sir:-

Under the terms of your Permit No. ~~21722~~.....you are required to complete your diversion works on or before.....**September 29, 1951**. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
