Dear Miss Christensen:

We acknowledge receipt of the depositions of yourself and two witnesses, also affidavit of publication in the Shelley Pioneer, all submitted in proof of completion of works and beneficial use on the above captioned Permit.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact Mr. Wesley Christensen at the time he makes the examination so that arrangements may be made to show him over the grounds. If this is not satisfactory with you please let us know at an early date.

Very truly yours,

Permit No. 21575

Proof of Application of Water to Beneficial Use
and Completion of Works
Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. My name is Esther Christensen, age is 61, residence is Shelley, Idaho, occupation housewife and P. O. Address is Route 2, Shelley, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Acting as an individual.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. The number of my permit is 21575 and date of permit is July 6th, 1950 and date I propose to establish is June 30th, 1950.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Drilled well in NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 30, T 1 S - R 36 E.,

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. The works consist of a drilled well with 18" casing and 75 H.P. turbine type pump and motor, a 10" column. The well is 200' deep and lifts 103'. Water actually stands at 101' and draws down about 2'. Sprinkler system is used here, and irrigate this all gravity. There are about 20 nozzles, 5/16" orifice and operate at about 50#. A booster pump to take this water from the gravity. The canals run clear through, they are private ditch and adequate to conduct all the water. My proportionate share in this is 1/6 of the 240 inches and my system will deliver this much easily.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. For irrigation on 20 acres in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ and 15 acres in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 25, T. 1 S - R 35 E., B. M., There is no natural meadow land and all improvements have been as a direct result of this use. My proportionate share of improvements is \$3,050.00.

Amey

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. For irrigation only

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. I feel that a miner's inch to the acre is about the minimum required.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. Assignment from Wesley Christensen for 40 miner's inches.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. This water was first started in 1950, but I applied it to my land in 1955 by assignment and have used it continuously since that time and I irrigate all the area mentioned in Question 6 during 1955.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. There is no other permit or any other water diverted from any other source on any of this land.

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is Jerome Evans, age is 39, residence is 1515 North 11th St. occupation is insurance and agricultural development, P. O. Address is 1515 North 11th St. Boise, Idaho.

Ques. 2. Are you acquainted with Esther Christensen, the holder of Permit No. 21575? How long have you known him and where does he reside?

Ans. I have known her 8 years and know that she resides 2 miles south and 1/2 miles West of Shelley, Idaho.

Ques. 3. Have you read or heard read said Permit No. 21575, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Drilled well in NW 1/4 NW 1/4 Sec. 30, T. 1 S - R. 36 E. Sprinkler system, main line is 6" steel pipe and portable aluminum 3" laterals and the sprinklers are taken off every 60'.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. 40 miner's inches and I have seen this conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. I have seen the pump deliver 240 miner's inches but of this amount I understand Mrs. Christensen has only 40 miner's inches. I base my opinion on seeing other wells measured and seeing water measured to give this estimate.

there are about 20 nozzles - 5/16" orifice and operate at about 50 lbs. There is a booster
pump to take this water from the gravity. This well will produce 240 miner's inches.

Ques. 5. How many second feet of water do you estimate said works will safely con-
duct to place of use, and how much water have you seen being so conveyed?

In my estimation I feel this well would conduct around 240" water to the place
Ans. of use.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons
per minute have you seen the pump deliver, and how did you measure or estimate the
amount?

Ans. I have seen this well when I felt that it was producing this much and I base
my opinion only on seeing other wells measured and seeing water measured to give this
estimate.

21575

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Used only for irrigation and there is no natural meadow land. All works as previously described are a direct result of said use. The irrigable area is described as: NW $\frac{1}{4}$ SW $\frac{1}{4}$ - 15 acres; NE $\frac{1}{4}$ SW $\frac{1}{4}$ - 35 acres; SW $\frac{1}{4}$ SE $\frac{1}{4}$ - 8 acres; NW $\frac{1}{4}$ SE $\frac{1}{4}$ - 40 acres; SW $\frac{1}{4}$ NE $\frac{1}{4}$ - 20 acres; SE $\frac{1}{4}$ NW $\frac{1}{4}$ - 40 acres; SW $\frac{1}{4}$ NW $\frac{1}{4}$ - 35 acres; and NW $\frac{1}{4}$ NW $\frac{1}{4}$ - 15 acres all in Sec. 30, T 1 S - R 36 E., for a total of 208 acres.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. No power.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

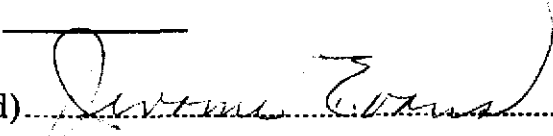

Ans. The land here is a good sandy loam, very productive when irrigated and I feel that it takes at least 1 miner's inch to the acre for profitable irrigation.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

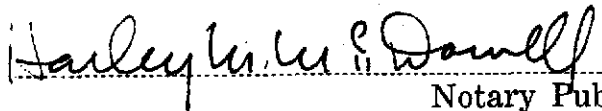

Ans. No.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I helped Wesley Christensen when he originally located this land and I have been familiar with the project at various times clear through his entire land development here.

Gentlemen:

We have checked the notice on the above numbered Permit in the name of Esther Christensen appearing in your issue of March 1 and find same to be correct with one slight typographical error which is in no way your fault as the copy of notice sent you was in error.

In the tenth line of the notice the range should be 36 instead of 35. In other words the line should read:

"36 E., B.M. and of the application to"

Please make this correction in your subsequent issues.

RE: Permit No. 21575

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

Esther Christensen
Route 2
Shelley, Idaho

Boise, Idaho

Dear ~~Mr.~~ Madam:

Under the terms of your permit No. 21575 you are required to complete your diversion works on or before July 6, 1955. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP

State Reclamation Engineer
