Attention: Fred A. Schwartz

Dear Mr. Schwartz:

We are enclosing your check in the amount of 50 cents (.50) issued to cover the recording fee of an assignment from Keith Mooso to Fred Frazier.

We do not find any record of a request for that assignment; neither do we find an assignment sent in by you. However, we did receive an assignment on Permit No. 21473 from Keith Mooso to Fred Frazier which has been recorded and Receipt No. 30584 has been issued to cover the recording fee.

In checking Permit No. 21474 we find the following:

License was issued to Ralph Boyce, July 19, 1956 for 3.8 c.f.s. from a well in the NE¹/₄ of Section 14, Township 3 South, Range 32 East, B.M. for 24⁹/₁₀ acres.

After a permit has gone to license we do not accept an assignment as the water becomes appurtenant to the land and is transferred the same as real property.

Notice of Proof Application of
Water to Beneficial Use

Dear Sir:

We have discovered an error in the above Notice which has been twice published thus far. We have taken the liberty of picking up the original Notice from the Blackfoot Daily Bulletin and requested that they hold up further publication.

The error is in the legal subdivision description of the source of supply of the water and the correct description is the NE $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec. 14, Twp. 3 South, Range 32 East Boise Meridian.

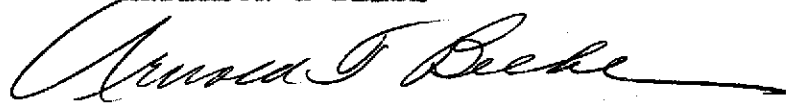

Accordingly, we are returning the original Notice to you with the request that you prepare another containing the correct description of the source of water as set forth above and changing the date of proof from December 17, 1955, to January 6, 1956, and forwarding the same to The Daily Bulletin with instructions to publish the same for four more weeks.

We have arranged with the newspaper for payment of the expense thus far incurred on the erroneous publication and this is your authorization to have the expense of the publication of the new Notice sent to Mr. Boyce.

We assume that this manner of handling this error meets your satisfaction and we would appreciate your sending us a copy of your letter to the newspaper in this regard.

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

Mr. Ralph Boyce

Pinckney, Idaho

Boise, Idaho **March 2, 1953**

Dear Sir:-

Under the terms of your Permit No. 21474 you are required to complete your diversion works on or before May 6, 1953. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

We acknowledge receipt of your letter of April 24, 1950, enclosing the application of Ralph Boyce for permit to appropriate subterranean water, accompanied by your check for \$7.75 to include the filing fee and certification of duplicate copy.

We are sorry to have to return the application for corrections as follows:

1. Question 4 describes the location of the point of diversion in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 14, whereas the sketch map shows it in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ of said Section.
2. Question 14 describes all of the NE $\frac{1}{4}$ of Section 14 except the SE $\frac{1}{4}$ NW $\frac{1}{4}$, whereas the sketch map includes the entire NE $\frac{1}{4}$.

Please make what ever correction is necessary to reconcile the description in the application and the sketch map.

Very truly yours,
