Subject: Application For Permit I.D. No. 72-16686

Troy:

Per our telephone conversation earlier today our non consumptive pond application in question is identified as listed in the "Subject". The three (3) diversions (surface stream flows) of which any or all of the three (3) could, in fact, direct flow(s) to the pond are as follows:

1. Diversion GPS I.D. No. A0002582 (Challis Creek; Custer County; T14N; R18E; S04; SESENE)
2. Diversion GPS I.D. No. A0002586 (Challis Creek; Custer County; T14N; R18E; S04; SWSENW)
3. Diversion GPS I.D. No. A0002588 (Bear Creek; Custer County; T14N; R18E; S03; NESWNW)

There are also two (2) springs plus ground water listed on the application as sources of feed to the pond all in: Custer County; T14N; R18E; S03; both SWSENE and SESENE.

Your input needs to be directed to Allen Merritt at the Southern Region of IDWR who is being copied with this email. For both your information this pond already has IF&G approval covered by Private Pond Permit No. 731-6-000017.

If anything further is needed please let me know.
