Re: Permit Review

ACREAGE -- The applicant applied for one acre of irrigation. The lots identified as the place of use total 0.3 acres. Therefore, the permit will limit the right to 0.3 acres of irrigation. To facilitate the creation of an efficient irrigation system, the diversion rate will not be reduced.

OVERLAP -- License 79-7010 and Claim 79-10377 may overlap this proposed use. The place of use described in the license file for 79-7010 is vague. Right 79-7010 has not been claimed in the SRBA. The SRBA recommendation for 79-10377 is not complete. I recommend that the field examiner for this permit investigate the possibility that the beneficial use may be covered by one of these other rights.
