Subject: App. 37-21742 Blaine County School District

Jim,

You requested that, if possible, the permissible place of use on application 37-21742 be reduced from 22.6 to 20 acres (to be consistent with the amount of supplemental irrigation being discontinued under water right 37-2657B). The attached map shows a permissible place of use of 20.4 acres. Six homes will be constructed in the southwest portion of the property beginning in 2007, which will reduce the total irrigated area by 18,000 ft² (0.4 acres). The proposed permissible place of use, by quarter-quarter, is the following:

- T1S R21E, Section 27 SWNE: 6.5 acres
- T1S R21E, Section 27 SENE: 2.8 acres
- T1S R21E, Section 27 NENE: 4.2 acres
- T1S R21E, Section 27 NWNE: 6.9 acres

The irrigated acreage in the SWNE of Section 27 will become 6.1 acres following home construction in this area, reducing the permissible place of use to 20 acres. The School District understands that, in the meantime, only 20 acres could be irrigated with supplemental water in any one season under the proposed permit.

Please call me if you have any questions. Again, thanks for your help.

Regards,
Christian
