DARREN OLSEN
FOREST SERVICE

REF: COMMERCIAL PERMIT FOR THE LODGE AND RESTAURANT

SUBJECT: ACCESS TO FOREST SERVICE GROUND

On June 13th, 2006 Scott Carlisle, Applicant, Steve Spencer and Darren Olsen with the Forest Service accompanied me during a field examination for SRBA claim 24-2038 to determine the location of the point of diversion.

During the field examination Darren Olsen explained to Scott Carlisle that no access to Forest Service ground was authorized to develop the commercial use. Darren gave Scott a brochure outlining the requirements that have to be met prior to the Forest Service accepting an application for a Special Use Permit.

The Special Use permit submitted with the application for permit has nothing to do with this commercial application. It was issued in June of 1996 to Scott Carlisle to install an 18-inch pipeline for fish propagation, 4-inch pipe to the hatchery and a 1½-inch pipe for domestic use from Spring Creek. Scott installed the 4-inch line to the hatchery, the 1½-inch pipe to the house and a 10-inch pipe for fish propagation.

The Lodge/Restaurant is built and Scott has connected it into the 1½-inch domestic pipeline. He has not complied with DEQ and Health & Welfare's requirements for using a surface water source in a public facility. For him to do that under permit 24-10673 it will require access to Forest Service ground to install an enclosed structure in the stream.
