RE: Draft App For Permit 72-16699

Dear Mrs. Bullock;

As we discussed, I have created the above-referenced application based on the written document that you submitted. An ArcView map of the proposed water system is enclosed. Please review the application and map for correctness. If you the application and map are accepted, please sign the application and return it to this office for processing. If changes need to be made, let me know.

Your check #5397 in the amount of \$730 is being returned to you, as the correct application fee is \$250.

Once we receive the corrected application, it will be held along with numerous others that have been filed in your area. Several agencies need to review the applications before processing can continue, so it could be some time before that occurs. If you have questions about the progress of this process, feel free to call Shelley Keen of our Boise office at 287-4947.

There is nothing to stop you from using your existing domestic well to provide water for the new house, as long as no more than ½ acre of land is irrigated in association with the home. We would issue a drilling permit for a new 6" domestic well, but probably not for a well with a larger diameter until this application is approved.

Regards,

James E. Stanton
Sr. Water Resource Agent
