Subject: Response to Crossroads PUD (ABC Agra LLC) letter

Art:

Attached is the proof report for right 36-2526 which covers the subject property. This right was recently partially decreed in the SRBA on 1/7/2002. Prior to finalization it was modified by transfer to change the nature of use of a portion of the irrigation use to commercial use. Although there were some issues identified with the transfer, it was ultimately approved on 5/29/2001 prior to partial decree. Although these lands have not been irrigated for sometime the right has been protected from forfeiture.

From the documents with your letter it appears that the water to the project may be supplied from the City of Jerome. Since they are a municipal provider it would be possible for them to service this area but the city will need to notify the department of a change in their service area.
