RECEIVED  
MAY 17 2006  
DEPT. OF WATER RESOURCES  
SOUTHERN REGION

To: Department of Water Resources:

I am enclosing two applications for water rights on my property in Stanley Idaho. The first is for a water well in which I am using for domestic use. The next is to take water from the Salmon River which butts up to my property. My plan for this water is to be used to irrigate my lawn and trees. I don't believe this should cause any problems because the water will just return to the water table next to the river. I have also enclosed some maps so that you can see the size and shape of the property. I spend the summers there in Stanley and during the winter I reside in Bakersfield California. I would like to give you some contact info if you have any questions. Thank you

Sincerely, Scott Ellison
