

**MEMORANDUM
ADDENDUM**

To: Transfer No. 70947

FROM: Lori Graves

DATE: January 17, 2006

RE: Updates Per Department Standards

Addendum: This transfer was advertised in October, 2004, without protest. It has not been forwarded to the SO for final approval because the applications that the transfer sought to mitigate have been and remain protested. In the meantime, department standards for processing these types of transfers have changed. Rather than listing only ground water recharge to account for the evaporative loss resulting from the ponds, applicants are now required to describe ground water recharge storage and diversion to storage. As a result, the draft approval has been modified accordingly and the following condition has been added:

“Transfer 70947 authorizes the diversion of water for Ground Water Recharge Storage in the amount of 47.2 af to be used for replacement of losses caused by evaporation from 16.93 acres total surface area of six (6) aesthetic ponds authorized for aesthetic storage under rights 63-31811, 63-31812, 63-31813, 63-31814, 63-31974 and 63-31975.”

This transfer was filed and reviewed before an SRBA final recommendation was made on claim 63-125G. At the time of review, 9143.0 total acres were considered irrigated within applicants service area as listed on the transfer application. An SRBA recommendation has since been made crediting 9420.0 irrigated acres within applicants service area. The transfer and associated rights have been modified to reflect the recommended acreage amount.
