

MEMORANDUM

Date: May 24, 2006
To: Transfer 71810
From: kwilson
Re: Evaluation

This transfer proposes to consolidate the total combined diversion rate (676.03 cfs) of these rights into the Porter (Diversion # 130557250) and Great Western (Diversion # 13075135) Canals. To accomplish this requires that a total of 6.01 cfs from these rights be transferred from the Monroc-Lyons pump (Diversion #13059490). As replacement water for stockholders a second transfer (71806) has been filed to move 4.61 cfs of 01-320 to the Monroc-Lyons Pump. Transfers 71806 and 71810 are being filed so that all diversion pumps in the New Sweden Irrigation District will have the latest priority right and will be charged as storage in Water District 01 accounting program.

Authority to File:

All lands are within boundary of the New Sweden Irrigation District. New Sweden Irrigation District has filed adjudication claim on these water rights in the Snake River Basin Adjudication. Water District 01 recognizes the New Sweden Irrigation District and the water districts accounting program attributes 6.01 cfs of these rights to the Monroc-Lyons pump.

Water Right Validity:

The rights involved in this transfer are based on water rights 01-01 (01-10162), 01-47M, 01-134 (01-134A), and 01-135 (01-135C) decreed in the 12/16/1910, Rexburg Irrigation Co. vs. Teton Irrigation Canal Co, et. al. decree. Water right 01-265 (01-10208) was decreed in the 06/25/1929 Woodville Canal Co vs. Clark & Edwards Canal & Irrigation Co, et. al. decree. The elements of these rights are based on the delivery records of the New Sweden Irrigation District and Water District 01 (records included), and recommendations from the SRBA adjudication staff. Forfeiture does not appear to be an issue.

Injury to Other Water Rights:

The transfer of these water rights should have no adverse effect on any other water rights.

Enlargement of Use:

This transfer does is not an enlargement of the New Sweden Irrigation District. The place of use remains within the boundaries of the New Sweden Irrigation District, and the total irrigated acres are from recommendations from the SRBA adjudication staff. No other enlargement issues identified

Local Public Interest:

No issues identified.

Beneficial Use Conservation of Water Resources:

No issues identified.

Review of the application finds no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
