

## MEMORANDUM

**Date:** May 18, 2006  
**To:** Water Right File 75-7404  
**From:** Shelley Keen *SWK*  
**Re:** License Review

---

**OWNER --** In 1999 Jeff Peppersack reviewed the deeds for the Bridge Point Subdivision and concluded that this permit covered a parcel to the south of the subdivision and Lots 1 and 2, but not Lots 3 and 4. Bob Foster confirmed in 2006 that the development in connection with the permit did not include Lot 2. Therefore, the license is being issued for the irrigation of land owned by Harold and Darlene Higley, who acquired an interest in the permit from Clara Bishop. Nevertheless, some of the original permit holders' names are being included on the license because they did not assign their interests. Higleys will have to submit an ownership change notice to have the other names removed from the right.

**OVERLAP REVIEW --** The only overlapping filings are statutory claims or SRBA claims based on statutory claims. Because they are not confirmed water rights, claims are not considered overlapping water rights.

**PLACE OF USE --** The place of use is 6.7 acres, which is less than the 8 acres recommended by the field examiner. The current method of calculating the number of irrigated acres is more precise than the field examiner's method. The rate and volume recommendations were reduced to correspond to the reduction in acres.
