Dear Mr. Widmann:

I am in receipt of your letter of August 21, 1990 concerning the above referenced permits. I will try to answer each of your question in the order as they were listed in your letter.

The rate of flow and volume listed on the license are parameters that identify limits to the extent that water can be diverted under each license. The quantities used are reflective of the diversion found in place at the time of an on site examination made by a department employee. The examinations were conducted on July 20, 1989 for all of the permits identified above. For example, the examination report on permit 21-7323 shows that a one horsepower pump was installed to supply water to sixteen lots. The examiner noted that only two homes were presently constructed and using water. Even though not all of the lots have houses constructed 16 lots were stubbed in to receive water supply from the well, therefore, the license that will include be issued for this permit will all sixteen lots. The rate of flow listed on the license identifies the estimated discharge capacity of the well installed and the volume listed on the license will reflect the requirements of the sixteen units even though only two are currently constructed. There is no further requirement on your part for adding the new homes on to the license as the construction of the remaining fourteen units are completed.

During a subsequent review of the above identified permits I discovered a mistake on all of the permits that caused the examiner's recommendations to be less than what was intended when the application for permits were filed. On the permit under item 8. (4) it asks for "Name of municipality to be served, or number of families to be supplied with domestic water." On each of the permits the number listed was the number of homes actually constructed at the time when the applications were filed. In looking at the subdivision maps which had the lots outlined that were to be supplied water from the well, it is obvious that all of the lots identified were intended to be included on the permit. Adjustments to the proposed licenses have been made.

MICROFILMED

AUG 31 1990

There seems to be some confusion on the permits that were filed by Pinehaven Planning Board, claims that have been filed under the Snake River Adjudication, wells being licensed, and proof of beneficial use being accomplished. I can understand this, it is confusing. I will address each one as listed.

1. The permits and claims both identify the wells designated to the lots within the subdivision. The claims filed refer to the permits filed. Since the permits are not yet licensed the items identified within the claims may later be changed to reflect the findings of the examination of the water developed under each of the permits filed.

2. The wells are not licensed at this time. This is what we are attempting to do now.

3. The claims filed in reference to the permits may be changed based upon actual water used as described above.

4. Proof of beneficial use has been filed (on the permits) and licenses will be issued based upon the examiner's findings and recommendations, not based upon statements made in the proof beneficial use if there are discrepancies. You will have an opportunity to resolve differences.

As to the uniqueness of Pinehaven Subdivision to other communities I don't believe that your situation presents any special problems that cannot be resolved. In filing the applications for permits it is obvious that there was a desire to only identify the lots served by a particular well. This action simplifies identifying obligations for meeting operating and maintenance expenses of the water system. Each community is organized in some similar fashion. In incorporated cities public water needs are supplied through municipal systems. It is true that municipal systems receive some "preferred" treatment under Idaho Water Laws but the cities are still required to file appropriate water rights. They are not required to file a new water right when the service area is increased but they are required to file when the capacity of the system is increased. The Pinehaven lot owners, in each of the identified water rights, will be covered by the licenses when issued even though the homes may not yet be constructed no additional water right filings will be required unless changes are made to increase the capacity of the existing diversions.

I hope that the above answers all of your questions and that you are satisfied with the adjustments made to the permits. If you have any remaining questions you can call me at Ph. 327-7947.

Sincerely,

JIM JOHNSON

IF THE DEPARTMENT FINDS THAT THE PERMIT SATISFIES THE CRITERIA ESTABLISHED IN CHAPTER 2, TITLE 42, IDAHO CODE, THEN THE DEPARTMENT SHALL ENTER AN ORDER CONTINUING THE PERMIT. Dear Mr. Carlsen:

We have reviewed the subject applications submitted by Pinehaven Planning Board, P.O. Box 58, Island Park, Idaho, for permits to appropriate the public waters of the State of Idaho.

As these wells have been in existence, and use, for 14-19 years, we have no comments regarding granting approval for water appropriation at this time.

Thank you for the opportunity to review these applications.

Sincerely,
