H. REMARKS AND OVERLAP REVIEW ANALYSIS

- #1 - No measurement possible
#2 - 1 1/2" line gravity flow

The two situations above lead me to recommend only 0.02 cfs for this system. A small line of only 1 1/2" diameter usually only carries a small amount of water and without an actual measurement I would be reluctant to recommend anything beyond 13,000 gph or 0.02 cfs.

Dear Mr. Jones:

Re: Darrell C. Neville

I enclose herewith three separate applications for permits to appropriate the public waters, all for Darrell C. Neville of Route 1, Rexburg, Idaho. Refer to your letter of January 13, 1981, when you returned an original single application we had submitted, and asked that three separate applications be made instead of incorporating the three into one. Also enclosed is Mr. Neville's check for \$90.00 which we hope satisfies the filing fee requirements. If not, please call and we'll send you any balance due.

Yours very truly,

Ray W. Rigby
