Re : Transfer 72607

Dear Sir :

We are in receipt of Transfer 72607 which addresses the transfer of the Point of Diversion for Water Rights 72 - 00007A and 72 - 16560.

In that these are existing Water Rights, All Conditions of Approval requirements should be held in line with any conditions, stipulations and/or laws which currently affect the Water Rights.

Please find that while we would be willing to work with the Department of Fish and Game, we would not be willing to comply with any Departments of Fish and Game requirements unilaterally which do not currently affect the 72-00007A and 72-16560 Water Rights - Provision Number 3.

We feel that the amount of water for irrigation as stated in Provision Number 2 would be more restrictive than the current amounts of irrigation water from Water Rights 72-00007A, 72-10032, 72-16559, 72-16560 and Groundwater. Also, this provision does not consider any irrigation water from another source which might be collected and applied to this place of use. The "Hubble Analysis" for this Drainage and specifically this point of diversion was stated by IDWR to be up to Sixteen (16) Miners Inches per Acre.

We are not willing to accept the Transfer 72607 unless the above stated concerns can be addressed and all conditions of approval meet the provisions which affect the Water Rights currently.

Respectfully,

Robin Wegner
