3. jstanton 8/17/2005 Comment/Analysis

Comment: This application proposes to tie two adjacent farms together to maximize efficiency of water use on the two properties that are now owned by the applicants.

Mr. Thacker, the former owner of the north farm, retained some of the decreed place of use but got no water with it; that water is being moved to some of the Carney land that was dried up on a previous transfer. The existing wells will continue to be used. The transfer appears to be approvable with standard conditions.

Authority To File: The applicants are either the owners of record, or they supplied deeds showing their purchase of the Thacker property. Carney Farms is registered with IDSOS as required.

Water Right Validity: These rights were decreed in 2001, so forfeiture is not an issue.

Injury To Other Rights: No issues identified. The two wells are in adjacent grid cells in the original ESPA model, so significant effects cannot be determined accurately. No determination of injury is possible.

Enlargement of Use: None requested.

Local Public Interest: No issues identified.

Beneficial Use/Conservation of Water Resources: No issues identified.

Beneficial Use/Conservation of Water Resources: No issues identified.

Review of the application finds that there is no clear inconsistency with criteria set forth in Sec. 42-222 I. C. preventing processing. At least prior to advertising, no other issues have been identified that would require further review or submittal of additional data by the applicant.

4. jstanton 8/17/2005 Legal Notice Remarks

Comment: This application proposes to tie two existing wells together on two adjacent farms for maximum efficiency of water use. The place of use will change slightly, as some land on the north farm was kept by the previous owners but without water rights. That water will be moved to land on the south farm that was dried up under a previous transfer to facilitate operation of a pivot sprinkler. The property is located 4-6 miles north and 17-18 miles west of Rupert.

Ground-Water Rights Transfer

Determine ground-water model row and cell for Water Rights Transfers

	Township	Range	Section	Zoom	GW model	
					Row	Column
"To" Cell	08S ▾	21E ▾	33 ▾		09	21

Determine rows and columns

Help

Fill in the legal description of the cells you want to put in the model spreadsheet and press the "Determine rows and columns" button.

Please note: If a section covers more than one ground-water model cell, the row and column values will be filled from the first cell found. To see a map of the the chosen section/cell press the zoom-button for the cell you want to inspect. **Please display each section using the zoom button for an individual cell or the "Display all sections" button.**
