NOTICE OF PENDING ORDER VOIDING PERMIT

Dear Permit Holder(s):

The development proposed in Permit to Appropriate Water No. 15-07053 was examined in 1988 by Department of Water Resources personnel. At the time of the examination, the Department personnel discovered that the actual place of use &/or point of diversion differed from the place of use &/or point of diversion proposed in the permit.

We have attempted on several occasions to persuade you to file an application for amendment of Permit No. 15-07053 with the Department. To date, the application for amendment of the permit has not been filed with the Department.

Enclosed is a completed application for amendment of your permit which reflects the correct point of diversion and place of use. You should sign the application for amendment, and return it to this Department accompanied by a \$20 filing fee within thirty (30) days of the date of this letter.

Should you fail or refuse to submit the application for amendment within thirty (30) days, the Department will act to void your permit. The grounds for voiding the permit are set forth in Section 42-219, Idaho Code, where it states that if the Department finds "that the applicant has not fully complied with the law and the conditions of the permit . . . [it] may refuse issuance of a license and void the permit." One of the conditions of the permit was that the point of diversion would be located as indicated on the permit.

Dear Mr. Harrison:

On two previous occasions the Department has written to you regarding the amendment of your application to correctly identify the source of water and location of the point of diversion.

Since a reply was not received for either letter, final action on your application is still pending.

Mr. Harrison, a reply from you would be appreciated. We need to know your intentions regarding the application? Is there some reason why you object to amending the application?

We will continue to delay final action on the application for another fifteen (15) days. If we have not heard from you by the end of this period then the necessary steps for taking administrative action will be initiated. Failure to respond would jeopardize approval of your application.

Mr. Dale Harrison

Dear Mr. Harrison:

In August, 1979, you should have received a letter from the Department outlining the findings of a field examination conducted by Tony Kozlowski, a Senior Water Resource Agent. Based on Mr. Kozlowski's findings, it was suggested the original application be amended to properly identify the source of water as being tributary to Little Malad River and to list the point of diversion as being in the NW $\frac{1}{4}$ SE $\frac{1}{4}$, rather than the NE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 11, T. 14S, R. 35E.

It is still our recommendation that you amend the application. For your convenience, an amended application reflecting the designated changes is enclosed. If you agree with our findings, please sign the amended application and return it to our office with \$20.00 for payment of the statutory filing fee.

If you are not in agreement with our findings, we would appreciate being notified of your contentions.

Dear Mr. Harrison:

ReL Application for Permit No. 15-7053

A representative of the Department of Water Resources completed a pre-permit field examination May 8, 1979 of your application to appropriate the water from an unnamed spring. This inspection indicated the unnamed springs are tributary to the Little Malad River and the point of diversion was in the NW $\frac{1}{4}$ SE $\frac{1}{4}$, Section 11 rather than the NE $\frac{1}{4}$ SW $\frac{1}{4}$, Section 11, Township 14S, Range 35E. Based on this information, it is our recommendation that you amend your application to correctly describe the source of water and the point of diversion.

To expediate the process, you will find enclosed an amended application with the above changes indicated in Items 2 and 3. MEMO TO FILE

APPLICATION FOR PERMIT NO. 15-7053

On May 8, 1979, I completed a pre-permit field examination for Dale Harrison's application for permit. The applicant accompanied me during the examination and described the irrigation system he has already constructed and intends to use this year.

Surface water emerges from a boggy area located in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 11, T. 14S, R. 35E, B.M. in the county of Oneida. The water is immediately collected and retained in a small reservoir having a depth of five feet at its center and a surface area of approximately 300 square feet. The water is retained in the reservoir by a small earth-fill dam.

Overflow from the reservoir spills through a small one foot wide and one foot deep trench located on the north side of the dam and flows downhill through a natural wash created by seasonal runoff and water from the spring.

When the water emerges from the wash, it spreads out upon and seeps into the ground, encompassing an area of approximately two acres. Most of the water from the spring is lost to seepage. However, an estimated 0.02 cfs drains from the land into the Little Malad River.

A measurement of the overflow was made in the spillway of the dam with a pygmy current meter, and the rate of flow was determined to be 0.10 cfs. I feel this amount accurately describes the total discharge from the spring.

Please note that the applicant diverts his shares of storage water in St. John Irrigation Company's Daniel's Reservoir from the Little Malad River which serves as a storage water conveyance. The applicant's storage water is diverted into the reservoir described above where it comingles with water from the spring. The comingled water is pumped from the reservoir at a point located in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of Sec. 11, T. 14S, R. 35E, B.M., County

of Oneida and into a sprinkler system used for the irrigation of approximately 160 acres of land located in the SE $\frac{1}{4}$ of Section 11, T. 14S, R. 35E, B.M., County of Oneida.

Water discharged from the springs serves primarily as a supplemental source of irrigation water. There appears to be sufficient water for the use intended and it appears that no one will be injured by this appropriation as there are no other water users on the spring and only a negligible quantity of water from the spring is tributary to the Little Malad River.

I recommend that this permit be approved subject to completion of a point of diversion amendment.
