MEMORANDUM

February 11, 1987

TO: File 13-7407

FROM: L. Glen Saxton *WLS*

RE: Submittal of Proof of Beneficial Use

The lapse notice for Permit No. 13-7407 was sent on November 21, 1986. Subsequent to that date, but on an undated memo, the department received a call from the permit holder relative to the lapse notice and was requested to return the call. Attempts to return the call were made for two weeks.

The permit holder eventually contacted the department and the proof of beneficial use was submitted. The proof, however, was submitted on the 66th day after the proof due notice was sent.

It is my recommendation in this case that the proof be considered timely filed and treated similar to extension requests where additional time is allowed to provide additional information. The priority, however, probably should be advanced the full number of days late, since the undated memo of the phone call does not provide a basis for other action.

RE: Permit No. 13-7407

Gary Len Miller
Box 184
Bancroft, ID 83217

Dear Permit Holder(s):

Enclosed is a copy of your approved Application for Permit. Note that one of the conditions of approval is that diversion of water under the permit is subject to the control of the Bear River watermaster. The reason for this is that some hydrologic studies of the Bear River indicate that wells constructed in the sand and gravel aquifers of the area may intercept water that otherwise would have entered the Bear River. However, the extent of the alluvial material thickness is not known nor is the precise degree of interference of wells with the Bear River surface water flows. Studies do indicate that as much as 50% of the water diverted from a well located one mile from the river would have reached the Bear River if impermeable layers of clay on hard rock do not separate the river from the aquifer from which the well is producing.

The information available to us at this time does not warrant refusing to issue you a permit but does merit cautioning you that any permit issued by the Department cannot deprive water users with earlier rights of their water supply.

The reason for conditioning the permit and explaining the potential interference problem is to make you aware that future tests may definitely show that diversion of water from your well should be administered together with the older surface water priorities of the Bear River and tributaries. If this were to occur, it would essentially mean that there would not be water available for a 1981 priority diversion from your well since the Bear River surface water system is fully appropriated. By locating your well as far from the

UNRECORDED

November 16, 1983

Page 2

river as possible and by casing out upper water producing zones as the well is constructed, you may be able to reduce the amount of interference with the river.

The 1983 Idaho Legislature added a requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed instructions entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
