REMARKS & OPINIONS:

I do not feel the flow from this spring is a significant one especially in a record water year like this. Also this flow ~~is~~ sinks quite a distance from the Cub River and could not be considered a contributor to the flow. The dense vegetation in the area would use up most of this residual water.

RE: PERMIT NO. 13-07370

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

INTER-DEPARTMENT MEMO — 1

FROM Ernie Carlsen

DATE Dec. 8, 1982

TO File 13-7370

SUBJECT Prior to recommending final action, on the above application, a pre-permit field examination needs to be conducted to physically examine the source. Based on the proximity of the stream to the Cub River and flow at time of the exam, the examiner should make some evaluation as to whether or not the stream contributes to the flow of Cub River.

REMARKS & OPINIONS: I do not feel the flow from this Spring is a significant one especially in a record water year like this. Also this flow sinks quite a distance from the Cub River and could not be considered a contributor to the flow. The dense vegetation in the area would use up most of this residual water.

RE: Application for Permit No. 13-7370

Dear Mr. Webb:

The Eastern Regional Office has completed initial processing of your application and no protests were filed against issuance of the permit. However, prior to recommending final action on the application, a representative of the Department will conduct a pre-permit field exam. Data from this examination will be used to evaluate what effect the consumptive use of water from this spring may have on existing water rights supplied by Cub River.

You can expect to be contacted at the time of this examination which we expect to conduct in the spring of 1983.

Respectfully submitted,

ERNEST CARLSEN
Assistant Regional Supervisor
