WATER RIGHT LICENSE

WATER RIGHT NO. 13-7269

Priority: November 16, 1979 Amount: .20 CFS 73.7 AFA

This is to certify, that DELMER L. OLSON
JIMMIE D. OLSON

RT. 2 BOX 637
PRESTON, ID 83263

has complied with the terms and conditions of the permit issued pursuant to Application for Permit dated November 16, 1979, and has submitted proof to the Department of Water Resources on June 21, 1983, that water has been applied to a beneficial use; an examination by the Department indicates that the works have a diversion capacity of .20 cfs of water from;

UNNAMED DRAIN tributary to SINKS

and that a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>VOLUME</u>
Irrigation	04/01 to 11/01	.19 cfs	73.5 afa
Stockwater	01/01 to 12/31	.02 cfs	.2 afa
Totals		.20 CFS	73.7 AFA

LOCATION OF POINT OF DIVERSION(S): SENW , Sec. 26, Township 14S, Range 40E
Franklin County

PLACE OF USE: Irrigation

14S	40E	27	NESE 11	SESE 10			21

Total number of acres irrigated: 21

PLACE OF USE: Stockwater, same as Irrigation use

CONDITIONS/REMARKS:

1. The right to the use of the water hereby confirmed is limited to the amount which can actually be beneficially used and is restricted and appurtenant to the lands or place of use and to the purpose herein described, as provided by the laws of Idaho.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
4. This right is limited to water not tributary to Station Creek.

of April, 1987.

Acting for the

Director

MICROFILMED

MAY 07 1987

BEFORE THE DIRECTOR OF THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF PROTESTS AGAINST APPROVAL OF
APPLICATION FOR PERMIT NO. 13-7269 IN THE NAME
OF DELMER L. OLSON AND JIMMIE D. OLSON

MEMORANDUM DECISION
AND ORDER

On November 16, 1979, Delmer L. Olson and Jimmie D. Olson filed with the Department of Water Resources an Application for Permit No. 13-7269 with the proposed point of diversion in the SE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 26, Twp. 14S, Rge. 40E B.M., Franklin County, for the appropriation of 0.43 cubic feet per second of water from an unnamed drain for the irrigation of 80 acres in the E $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 27, Twp. 14S, Rge. 40E from April 1 to November 1; along with 0.03 cubic feet per second and 0.04 cubic feet per second from January 1 to December 31 for stockwater and domestic uses respectively, also to be used within the E $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 27, Twp. 14S, Rge. 40E B.M.

Notice of this application was published in the Preston Citizen, Preston, Idaho on December 6 and 13, 1979 and on December 20, 1979 was protested by Theo L. Smith and David Terry Westerberg. The protestants alleged Mr. Olson installed the drain pipe in a spring which was tributary to Station Creek, that no water was developed by the drain, and that the application changed the point of diversion for the applicants' decreed right from Station Creek. On March 18, 1980, the Department conducted a conference in Franklin County Courthouse, Preston, Idaho. The applicants were present and represented by Attorney Kent Foster of HOLDEN, HOLDEN, HAHN AND CRAPO. The protestants were present and represented themselves.

Mr. Delmer Olson testified he began construction of the drain system in 1976 with the primary purpose of drying boggy areas in his fields, thereby creating an additional five to seven acres which could be farmed, and then using the developed water as proposed by the application. He estimated water presently flowing from the drain to be 0.25 cubic feet per second to 0.33 cubic feet per second and expects additional water to be developed when the project is completed. Mr. Olson stated surface water flow from the areas being drained occurred only during spring runoff.

Mr. David Westerberg stated he felt the application would have to be subject to all prior water rights on Station Creek. He also stated if the permit would allow Mr. Olson to change his decreed point of diversion from Station Creek then the other water users on Station Creek should be granted the same privilege.

MIC-1111

Mr. Theo Smith stated a branch of the system was constructed in a natural drainage which had been filled in. This drainage had historically been tributary to Station Creek and including it in Mr. Olsons' system would reduce the flow of water available to fill decreed rights on Station Creek.

At the conclusion of the conference, the parties agreed to allow the Department to reach a decision based on the information presented at the conference. Later that day, an agreement between the parties was submitted to the Department which reads as follows:

"We, the undersigned, have agreed that Delmer Olson and family may extend the drain to the three proposed wet spots. They would also be able to bring the water from that drainage system down to the farm for the proposed uses. This water would be brought down by a buried line. This line would be equipped with a valve at the end for the release of the water if prior water rights demand that release. This is in reference to Application for Permit No. 13-7269.

The Olsons also agreed to withdraw their objection to the Smiths' proposal to change their point of diversion. (11-0857)

The Olsons will be allowed, with no objection from Smith and Westerberg to change their diversion point.

All water rights owned by Delmer Olson and Jimmie Olson will be contained in the line from the drainage and the existing culinary line."

Although this agreement may be binding among the signers, the location change for Mr. Olsons' decreed point of diversion sanctioned by the agreement cannot be consummated by this application for permit. Such a change to a decreed water right must be initiated by filing an application for transfer with the Department of Water Resources, and is, therefore, not properly before the Director in his consideration of this application for permit. Furthermore, the agreement does not resolve the issue of whether or not Mr. Olsons' drain is a tributary to Station Creek. Since this is a primary consideration for the Department in proceeding with final action on this application, the Department's official files have been reviewed along with the available information presented at the conference, and based on the Director's understanding of the law, the Director of the Department of Water Resources makes the following Findings of Fact, Conclusions of Law, Analysis, and Order.

FINDINGS OF FACT

1) The applicants are the owners of the designated place of use and point of diversion.

2) Through the installation of buried drain pipes, the applicants intend to drain certain wet areas in the NE $\frac{1}{4}$, Sec. 26, Twp. 14S, Rge. 40E B.M., reclaiming five to seven acres for production of crops and to utilize the collected water for the irrigation of land in the E $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 27, Twp. 14S, Rge. 40E.

3) Information provided at the conference and analysis of the NE $\frac{1}{4}$, Sec. 26, Twp. 14S, Rge. 40E indicates wet or boggy areas in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$, E $\frac{1}{2}$ SW $\frac{1}{4}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$ NE $\frac{1}{4}$ are primarily a result of annual precipitation, irrigation practices, and seepage water from Mink Creek Canal which has developed subsequent to the construction of the canal around 1948. Seepage from Mink Creek Canal does not, because of the topography of the area, drain into the W $\frac{1}{2}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$ of said section; but that area is shown as a natural drainage to Station Creek on the U.S. Geological Survey maps for Riverdale, Idaho and Mink Creek, Idaho.

4) The water rights of the protestants were decreed on July 14, 1920 in the case of Utah Power and Light Company vs. The Last Chance Canal Company.

CONCLUSIONS OF LAW

1) Water developed by the applicants from wet areas which have formed since the construction of the Mink Creek Canal is not subject to prior rights on Station Creek.

2) The applicants are entitled to a permit for the appropriation of the public waters of the State of Idaho which they have developed and which are not tributary to Station Creek.

ANALYSIS

The Department has always recognized an individual's right to drain wet or boggy areas of his land to render it more suitable for use. If the water collected has traditionally been utilized to fill established water rights, then the individual is still entitled to appropriate the quantity of water required for the irrigation of land actually drained. Conversely, if the water collected is determined to be unappropriated, then the individual may appropriate it for any beneficial use. Since the application indicates the water will be used to irrigate land other than that drained and the applicants have stated they do not feel this application should be subject to watermaster control and prior water rights on Station Creek, the Department has limited the appropriation of water to those wet areas formed subsequent to the construction of Mink Creek Canal and not tributary to Station Creek. Therefore, water collected from wet areas in the W $\frac{1}{2}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 26, 14S, Rge. 40E should be discharged into the natural drainage.

ORDER

IT IS, THEREFORE, HEREBY ORDERED and Application for Permit No. 13-7269 be and is APPROVED subject to the following conditions:

1) That this permit be and is subject to all prior existing water rights on the same water source which is seepage water from the Mink Creek Canal but is not

subject to the decreed water rights of the protestants.

2) No water shall be diverted from the drain located in the $W\frac{1}{2}NW\frac{1}{2}NE\frac{1}{4}$, Sec. 26, Twp. 14S, Rge. 40E B.M., but the water from that drain shall be allowed to flow unrestricted into Station Creek.

3) A measuring device of a type approved by the Department shall be permanently installed and maintained as part of the diverting works.

4) The rate of diversion of water for irrigation under this permit and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.

5) Water collected for appropriation under this permit shall be limited to the drainage of those wet areas in the $SW\frac{1}{4}NE\frac{1}{4}NE\frac{1}{4}$, $SE\frac{1}{4}NW\frac{1}{4}NE\frac{1}{4}$, $E\frac{1}{2}SW\frac{1}{4}NE\frac{1}{4}$, $NW\frac{1}{4}SE\frac{1}{4}NE\frac{1}{4}$, which formed subsequent to the construction of Mink Creek Canal.

6) Proof of construction of works and application of water to beneficial use shall be submitted to the Department on or before April 1, 1986.

Dated this 8 day of April, 1981.

G. STEPHEN ALLRED
Director

208-852-1772
post office address Rte 2, Box 637, Preston, Idaho 83263
2. Source of water supply Unnamed drain (as per tele-con 11/21/79)
Ground Water which is a tributary of _____
3. a. Location of point of diversion is SE $\frac{1}{4}$ of NW $\frac{1}{4}$ of Section 26 Township 14S.
Range 40E B.M. Franklin County; additional points of diversion if any: _____
- b. If water is not consumed, it will be discharged into _____ at a point in _____ $\frac{1}{4}$ of _____ $\frac{1}{4}$ of Section _____ Township _____ Range _____ B.M. _____
4. Water will be used for the following purposes:
Amount .43 for Irrigation purpose from April 1 to Nov 1 (both dates inclusive)
(cfs or acre-feet per annum)
Amount .03 for Stockwater purpose from Jan 1 to Dec 31 (both dates inclusive)
(cfs or acre-feet per annum)
Amount .04 for Domestic purpose from Jan 1 to Dec 31 (both dates inclusive)
(cfs or acre-feet per annum)
5. Total quantity to be appropriated:
a. .5 cubic feet per second and/or
b. _____ acre feet per annum.
6. Proposed diverting works:
a. Description of ditches, flumes, pumps, headgates, etc. Enclosed 4 inch pipeline approximately 4000 feet from diversion to sprinkling and culinary systems for two houses to be used directly or from storage pond. Underground water is collected at the point of diversion by means of approximately (*See below)
b. Height of storage dam 10 ft. feet, active reservoir capacity 2-3/4 acre feet; total reservoir capacity 2-3/4 acre feet, materials used in storage dam: Earthen
Period of year during which storage will occur April 1 to Nov 1 inclusive.
(Mo. Day) (Mo. Day)
c. Proposed well diameter is 6 inches; proposed depth of well is 8 feet.
7. a. Time required for the completion of the works and application of the water to the proposed beneficial use is 5 years.
b. Estimated construction cost is \$ 5,000.00
8. Description of proposed uses:
a. If water is **not** for irrigation: NE (as per tele-con 11/21/79)
(1) Give the place of use of water: SE SW $\frac{1}{4}$ of SE $\frac{1}{4}$ of Section 27 Township 14S
Range 40 E. B.M. _____
(2) Amount of power to be generated: _____ hp under _____ feet of head.
(3) List number of each kind of livestock to be watered 100 cattle
(4) Name of municipality to be served _____, or number of families to be supplied with domestic water Two families
(5) If water is to be used for other purposes describe: _____

* 2590 lineal feet of buried perforated drain pipe and 705 lineal feet of 6 inch perforated drain pipe. Applicants expect to install approximately 850 lineal feet more of the 6 inch perforated drain pipe.

b. If water is for irrigation, indicate acreage in each subdivision in the tabulation below:

11. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

Scale: 2 inches equal 1 mile

MICROFILMED

IN THE MATTER OF:

AFFIDAVIT

State of Idaho
County of Franklin

THEO L. SMITH being first duly sworn,

deposes and says: I wish to file an Exception to claim No. 13-7269
for a water right. Last year Delmer Olson filed for the same
water - claim No. 13-4088 - from the same source, calling it
"unnamed springs" tributary to Station Creek. This year he filed
calling it an "unnamed drain" with the only change being a small
distance in his diversion point. This drain consists of tiling
the best spring on the head waters of the left fork of Station
Creek. It made a clean spring where it had been cat-tails and
watercress, but it did not produce one drop more water.

Last water season the Olsons attempted to use this water. Due
to adverse affect it had on prior rights, I called Mr. Loy Johnson.
He requested Mr. Russell Stoker to investigate the problem. Mr.
Stoker checked the complete Station Creek drainage (consisting of
three water users). He then had Mr. Olson and myself accompany him
to this "unnamed Spring" which he now calls an "unnamed drain" and
read from the Idaho Code to Mr. Olson. He ordered Mr. Olson to
cease all interference and activity with this water or he would be
subject to arrest, as this water is a tributary of Station Creek.
I have measurements on this water during the past years and find no
increase in water. In addition to irrigation, the Olsons are attempting
to claim more stockwater and domestic water. At present, they have
their domestic and stockwater connected to the same system as their
houses, which are located close together and consists of two storage
tanks and 1½" pipelines.

IN THE MATTER OF:

AFFIDAVIT

State of Idaho
County of Franklin

being first duly sworn,

deposes and says: There is no stock water problem for them because,
in addition to the water previously mentioned, both forks of Station
Creek run the complete distance through their property. The left
fork runs through their corrals and yards. It appears to me, their
claim for stock and domestic use is disguised for irrigation use.

Regarding the diversion point, I wish to protest for the following
reason: It is a small stream, approximately four miles in length,
with only three water users. In order not to have adverse effect
on the others if one diversion point is changed, the other two
should be allowed the same privilege. Since this is such a small
area, basin and hollow, I feel that any drain can take only existing
water.

I am submitting several more agreements and affidavits as evidence attached to this protest.

RE: Permit No. 13-7269

Jimmie D. Olson
Rt. 2, Box 637
Preston, ID 83263

Dear Mr. Olson:

In follow-up to our recent meeting, this correspondence is to provide you with a summary of items discussed and conclusions reached on the requirements for licensing the above referenced permit.

In our meeting, we determined that water used for in-house domestic purposes comes from a spring source which is separate from the water used for irrigation and stockwater identified under Permit 13-7269. Since the spring water usage represents a different source than what was intended under this permit, the request to amend the permit to include the spring is unnecessary.

We also discussed the fact that the unnamed drain water was used to irrigate the lawns and gardens of the two homes. Since this is included under the irrigation use, it is not necessary to include the domestic use on the license.

In conclusion, we determined that no amendment of the permit is necessary prior to licensing and that the license will only include irrigation and stockwater uses.

If you have any questions or if I can be of any further assistance, please let me know.

Sincerely,

JIM JOHNSON
Water Rights Supervisor

MAY 07 1987

MEMORANDUM

TO: File 13-7269

FROM: Jim Johnson *hw*

DATE: March 27, 1987

RE: Meeting With Mr. Jim Olson Concerning the Licensing of This Right

In response to my letter of 3/10/87, Mr. Olson met with me to cover the reasons for requiring the amendment.

In our conversation, Mr. Olson further explained the use of water for domestic purposes from the "spring". Water from the spring is collected into a pipe which is buried underground in the same trench that was used to bury the pipe from the seep areas. The spring water is piped into the two homes for "in-house use only".

This permit, when it was filed, did not intend to include the water from the spring as part of the permit. Therefore, only one source, "unnamed drain" was identified on it.

Water from the unnamed drain is used on the "outside" of the homes for irrigation of lawns and gardens. ~~However~~^{and}, Mr. Olson agreed that the irrigation use identified on the examination did appear to include these areas.

In conclusion, it was agreed that the spring water source should not be included on this right, making the need for filing the amendment of permit unnecessary.

The license should be issued for only the "unnamed drain" water and the domestic use should not be included since drain water is only used for irrigation and stockwater.

Delmer L. & Jimmie D. Olson
Rt. 2, Box 637
Preston, ID 83263

Gentlemen:

On February 5, 1987 this Department sent you correspondence stating that a license would be issued within ten days if you concurred with the proposed draft.

After additional review, we discovered that a second point of diversion used under this right was not within the legal description identified on the original permit. Before a license can be issued, an amendment of permit correcting the description is required.

The enclosed application for amendment contains information that will be included on the license when it is issued. Please review carefully and if you concur, sign the amendment and return with the \$20.00 filing fee within 30 days.

If you do not concur with these findings or if you have any questions, please contact us within the 30-day period.

Sincerely,

JIM JOHNSON

MEMORANDUM

FROM: Gary Spackman *Gary*
TO: File
RE: Water Right No. 13-7269
DATE: March 4, 1987

A question arose concerning the conditions imposed by the Memorandum Decision and Order for the approval of applications for Permit No. 13-7269, particularly condition 5 which stated that "water collected for appropriation under this permit shall be limited to drainage of those wet areas in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$, E $\frac{1}{4}$ SW $\frac{1}{4}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$ NE $\frac{1}{4}$. The field exam does not show exactly what area is drained.

On March 3, 1987, I spoke with Harold Jones of the Eastern Regional Office, the field examiner who examined Permit No. 13-7269. Harold stated that the point of diversion located in the SE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 26, T14S, R40E, was the end of the drain pipe, and that the drain pipe extended east from the located point of diversion for approximately 2,000 feet. Harold did not visually see the pipe since it was buried underground, but his statement is based upon representations of the permitholders.

The drain as located would probably drain the parcels to which development was limited in the Memorandum Decision and Order. By consulting the USGS quad map, it does not appear that water would collect surface water from the northern drainage area where collection was prohibited.

The domestic use of the permitholder is located downstream from the originally indicated point of diversion. The small diversion, however, should not significantly impact prior rights, and I recommend that an amendment be sent to the permitholder changing the point of diversion.

Gentlemen:

Re: Application for Permit No. 13-7269
Delmar L. and Jimmie D. Olson

On April 8, 1981, the Director of the Department of Water Resources issued a decision approving Application for Permit No. 13-7269 in the name of Delmar and Jimmie Olson subject to six conditions.

Condition two (2) stated that, "No water shall be diverted from the drain located in the W1/2NW1/4NE1/4, Sec. 26, Twp. 14S, Rge. 40E, B.M., but the water from that drain shall be allowed to flow unrestricted into Station Creek." This condition was imposed because of the information presented at the conference which indicated a lateral drain had been extended through this area.

Our review of the data revealed that such a lateral drain would intercept water that would reach Station Creek. We now understand that no such lateral drain was even installed, but that the main trunk line crosses through that area.

On March 4, 1982, Delmar and Jimmie Olson, through their attorney, requested that this condition be modified. While the Department did not intend for this condition to necessarily apply to the trunk line, it is important that the water from that area not be

drained or the flow in Station Creek diminished. Condition two is necessary to make it clear that Permit No. 13-7269 does not authorize the drainage of the W1/2NW1/4NE1/4, Sec. 26. Therefore, no amendment of the April 8, 1981 memorandum decision will be made.

Sincerely,

A. KENNETH DUNN
Director

IN THE MATTER OF PROTESTS AGAINST	)	
	)	
APPROVAL OF APPLICATION FOR PERMIT	)	PETITION FOR MODIFICATION
	)	OF MEMORANDUM DECISION
NO. 13-7269 IN THE NAME OF DELMER	)	AND ORDER
	)	
L. OLSON AND JIMMIE D. OLSON	)	
	)	

COME NOW Delmer L. Olson and Jimmie D. Olson, and hereby
petition the Director of the Department of Water Resources to
modify that Memorandum Decision and Order entered in the above-
entitled matter on the 8th day of April, 1981, to make said
decision comply with certain facts discovered subsequent to
the entry of said Order.

Said Decision and Order recites on page 4 thereof that:

2) No water shall be diverted from the drain located
in the W $\frac{1}{2}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 26, Twp. 14S, Range 40 E.B.M.,
but the water from that drain shall be allowed to
flow unrestricted into Station Creek.

The Olsons understand that said legal description was based upon
a review of a USGS quadrangle map of the area and that the
personnel who prepared said description were under the assumption
that an existing drain extended into and drained a portion of
the above-described property. Subsequent review and investigation
has shown that, in fact, there is no existing branch of the Olsons'
drain which extends into or drains any wet or boggy spots in the

Re: Delmer and Jimmie Olsen - Application for
Permit No. 13-7269

Dear Mr. Carlsen:

I have just received from the Olsens a copy of an agreement which apparently was written and signed by the parties later the same afternoon of the hearing, which we all attended in Preston last Tuesday, March 18, 1980. We have also had an opportunity to review the specific terms of this agreement with our clients in some detail. After our conversations, it appears to us that the parties who signed the agreement may not have all intended the same thing and we therefore felt it might be appropriate to write to you and discuss the matter further.

We will refer specifically to the last sentence of the first paragraph of the document which was signed:

This line will be equipped with a valve at the end for the release of the water if prior water rights demand that release.

Our clients' position is obviously that the water supply for the right which they intend to appropriate is not presently tributary to the surface waters in the area, and specifically does not and has not contributed to the surface flows of Station Creek. They are convinced that the water supply for this right is subterranean water which formerly served only to create boggy wet areas on their farm ground and which presently continues to do so in two or three remaining spots.

We, of course, believe and contend that all of the information produced at the conference supports this position. In otherwords, the Olsens, who are most familiar with the matter.

RECEIVED

Mr. Ernest Carlsen
March 25, 1980
Page Two

believe that the waters which presently flow from the end of the drain pipe augment the flows of the small tributary to Station Creek from what those flows were prior to the installation of the drain.

On the other hand, we understand that at least some of the protestants doubt that this is true. Although we did not hear any testimony or information which would tend to support that position, it seems clear to us that Mr. Theo Smith, in particular, has at least some personal belief or suspicion that the waters now exiting from the drain are indeed the same water which ultimately found its way into Station Creek or its tributaries formerly.

As we understand it, the parties probably did not intend to resolve that issue by this document which they all signed. For instance, when questioned, our clients responded that they had agreed to place a valve at the end of their system for handling this drainage water in order to placate Mr. Smith, because they believe he did not have any water rights which would be prior to this one, since it is a right to a source not tributary to Station Creek. In otherwords, in using this language, our clients did not believe they were really giving up anything with respect to their right to the use of the drain water in agreeing to install the valve.

In our judgment, therefore, one of the most important issues to be resolved in this case is whether the source of supply for this proposed water right is or is not legally tributary to the surface flows of Station Creek.

Yours very truly,

Kent W. Foster

I

To whom it may concern.

Delmer L. Olson Disposes and says.

Preston, Idaho
March 21, 1980

RECEIVED

APR 10 1980

Department of Water Resources
Eastern District Office

Tuesday March 18, 1980 the parties of a water dispute, One Idaho State water resource man from Boise, one man from Idaho, Falls, my Council Mr Kent Foster, and spectators met in a hearing at Franklin County courthouse. Application # 13-7269 was read and the reasons for and against the issuing a permit were called for. Recordings of this hearing were taken so it is now a matter of record.

Mr Theo Smith stood before the group and monopolized the time by drawing marks on the blackboard and speaking mostly of irrelevant things. Because so many of his statements were lies and because there was no time to give a rebuttal, I am writing this statement.

Mr Smith spoke of the early settlers of Station Creek as if he knew them personally. Some of his statements were true. No one questions that the predecessors who operated the farm he now owns appropriated waters of Station Creek in 1882. There were also

MICROFILMED

3 other people who lived and used water on their farm in these early days.

My Grandfather moved to Station Creek from Sweden in 1886. Among his children was my Father Gustaf E. Olson. These families homesteaded two tracts of land on a small stream which they named Snake Creek. Mr Smith referred to this stream or spring as the Bergquist Spring. My forbears immediately began to use the water from these springs for culinary and irrigation. They and I have continued to use this water until August of 1979. At that time my neighbor Mr. Smith called the Water Resource Board at Idaho Falls. They sent Mr Russell Stoper to tell me to turn the water down the main stream. It is true that Mr Smith had asked me to turn off my sprinklers prior to Mr Stokers telephone call. It is also true that Mr Smith and his daughter took pictures of my sprinklers, at that time I thought I had a valid right to use this water.

ENCLOSURE
You see my Father and Grandfather were law abiding men. I purchased the farm from my Father Jan 19, 1945

We bought title insurance. I examined the abstract of title and found that this farm did have a right to .06 C. F. S. of water from the main station creek. I never used this water because the diversion point was not on my land. There are five (5) entries on this abstract (Only one of which is a signed affidavit) saying that certain springs are for use on this farm. They are located on this small stream of Snake Creek. These statements are recorded at the Franklin County Court house. Father told me that these springs were not figured in the Bear River decree of 1920 because they were used before they reached the main stream.

Therefore I am innocent of stealing water. Mr. Stoker's call and subsequent visit was the first time a man with authority had asked me to turn off the water.

Now as to the relevant statements by Mr. Smith concerning my claim #13-7269 I did hire Mr. Smith and his Bulldozer to push dirt for a proposed ditch. It is an undisputed fact that he pushed hawthorns, brush and noxious weeds and mired his cat in mud while leveling my land. One need only to examine photos of land prior to

MICROFILMED

4 to this time to dispute this claim. It is also an untruth that he worked for me driving his uncle Seren's team and watered them in mud in my field. There are men still living who helped farm when we used horses. They can testify that it was necessary to come $\frac{3}{4}$ of a mile to our house where we had a watering trough.

It is very serious to me and upsetting when Mr. Smith tells me I have no right in a low water year to even use my house water. Does 90 years of ~~uninterrupted~~ use of culinary water have any valid claim?

When we drink, flush the toilet or do laundry the water is recycled and it runs on down to Mr Smith's Farm.

I hope the forgoing statements can be filed to counteract untruths recorded in the recent hearing

March 18, 1980

We, the undersigned, have agreed that Delmer Olson and family may extend the drain to the three ~~the~~ proposed wet spots. and They would also be able to bring the water from that drainage system down to the farm for the proposed uses. This water would be brought down by a buried line. This line would be equipped with a valve at the end for the release of the water if prior water rights demand that release. This is in reference to Application for permit No. 13-7269.

The Olson's also agree to withdraw their objection to the Smith's proposal to change their point of diversion. (11-0857)

The Olson's will be allowed, with no objection from Smith and Westerbergs to change their diversion point.

All water rights owned by Delmer Olson and Jimmie Olson will be contained in the ~~not~~ line from the drainage and the existing culinary line.

Theo also ~~landed~~ moved some earth into wet areas that previously could not be farmed.

MICROFILMED

- $1\frac{1}{2}$ " pipe for culinary water to Delmer Olson & Jimmie Olson property.
- ~~Theo~~ has marked ~~pipe~~ culvert for .2 cfs $\frac{1}{2}$.3 cfs, $\frac{1}{4}$ water from Left Fork has not exceeded 0.2 cfs.

of Claim 13-4088.

- ~~Spring~~ Unnamed spring is below existing drain.

Concerns - Water developed from drain will reduce flow from left fork.

End of drain to creek - 3000' Left Fork to Smith Diversion $\frac{1}{2}$ mi.

- Application is for ~~for~~ a different source of water which may not prove to be 0.50 cfs.
- There is water entering the drainage below the ~~terminal~~ end of the drain.

* Need to make a finding on whether drain $\frac{1}{2}$ has developed new water or if it was previously tributary to Left Fork of Station Creek

MICROFILMED

BEFORE THE DIRECTOR OF THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF PROTESTS AGAINST	)	
	)	
APPROVAL OF APPLICATION FOR PERMIT	)	
	)	
NO. 13-7269 IN THE NAME OF DELMER	)	
	)	
L. OLSON AND JIMMIE D. OLSON	)	NOTICE OF CONFERENCE
	)	AND/OR HEARING
	)	

On November 16, 1979, Delmer L. Olson and Jimmie D. Olson filed with the Department of Water Resources an application to appropriate the public waters of the State of Idaho. On December 20, 1979, the Department received protests against approval of said application from Theo L. Smith and David Terry Westerberg.

The Department has set the matter of protest for conference and/or hearing for Tuesday, March 18, 1980, at 11:00 a.m., in the Jury Room of the Franklin County Courthouse, Preston, Idaho. Any hearing will be held in accordance with provisions of Chapter 2, Title 42, and Chapter 52, Title 67, of the Idaho Code and adopted Rules of Practice and Procedure of the Department of Water Resources. Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved.

In accordance with Idaho Code, Section 42-203, the following issues are involved in the consideration of the application and protest(s):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use conflict with the local public interest?

RECEIVED
MARCH 18 1980
IDAHO DEPARTMENT OF WATER RESOURCES

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes at the expense of the requesting party. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

If the hearing is conducted by a hearing officer appointed by the Director, rather than the Director himself, a proposed decision will be submitted to the parties and the parties will be afforded an opportunity to file exceptions to the proposed decision and present briefs and oral arguments to the Director prior to the issuance of a final decision by the Director. This procedure is required by Idaho Code, Section 67-5211.

By written stipulation, the parties may waive compliance with Idaho Code, Section 57-5211. If the hearing is conducted by a hearing officer, the hearing office will ask the parties at the close of the hearing whether they would like to make such a stipulation.

Failure to waive compliance with Idaho Code, Section 67-5211 will not prejudice the Director's review of the party's evidence and arguments. However, such a waiver will shorten the decision-making process and may expedite substantially the issuance of a final decision. Whether compliance with Section 67-5211 is waived will not affect a party's right to petition for a rehearing of the final decision pursuant to Rule 11 of the Department's Rules of Practice and Procedure or affect a party's right to appeal the final decision to the District Court.

Failure to appear at the time and place set for hearing by the applicant or protestant(s) may allow the Department to dismiss without prejudice the protest(s) or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

Dated this 6th day of March, 1980.

RONALD D. CARLSON
Eastern Region Supervisor

RE: Application for Permit NO. 13-7269 OLSON

Mr. Theo L. Smith
Rt. #2
Preston, Idaho 83263

Dear Mr. Smith:

Your protest against the approval of the above referenced application has been received and a copy has been sent to the applicant. The Department suggests you contact the applicant directly in an effort to determine what is proposed by the application and to attempt to resolve the protest.

If you do not advise us within twenty (20) days that the protest has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use under this permit conflict with the local public interest?

If this office can be of further assistance, please contact us.

Very truly yours,

RONALD D. CARLSON
