
A hand-drawn map on a grid. The vertical axis is labeled 'T O W N S H I P S' and the horizontal axis is labeled 'R A N G E'. The map shows a ship's position at the intersection of '27' on the vertical axis and '26' on the horizontal axis. A small circle with an arrow points to this intersection, labeled 'RD.'. The range '40 E' is marked on the horizontal axis. The numbers '22', '23', '25', and '26' are also present on the horizontal axis.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.

Be it known that the undersigned, being duly sworn, deposes and says that he, she, they subscribed the foregoing claim to a water right, together with all attached information, and that the matters and facts therein are true to the best of the affiants knowledge.

STATE OF IDAHO

DEPARTMENT OF WATER RESOURCES

Section 42-225a, Idaho Code

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. **The filing of this claim does not confirm the water right but will serve for information purposes only.** It may, however, become the basis for future adjudication of the water right by the Court.

Notice is hereby given that Jim W. Elsmore and Keith Barthlome
(name of claimant)
of Route #1, Grace, Idaho, claims a right to the diversion and beneficial use of
(mailing address)
the public water of the State of Idaho

The extent and nature of said claim is as follows:

- (1) Describe source of water: (name of stream, lake, spring, etc., or ground water) Unnamed Spring
_____, tributary to, _____ sinks
- (2) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:
- | | | | | | | | |
|--------|-------------|-----|-------------------|---------------------|---------------|----|----------------|
| Amount | <u>0.08</u> | Use | <u>Domestic</u> | Period of Use: From | <u>Jan. 1</u> | To | <u>Dec. 31</u> |
| Amount | <u>0.06</u> | Use | <u>Stockwater</u> | Period of Use: From | <u>Jan. 1</u> | To | <u>Dec. 31</u> |
| Amount | _____ | Use | _____ | Period of Use: From | _____ | To | _____ |
- (cfs, gpm, or gpd) (dom., irri., stock, etc.) (both dates inclusive)
- (3) Total quantity of water claimed: 0.14 cubic feet per second, or _____ acre feet per annum, and/or 60 gallons per minute.
- (4) Priority claimed: (the date water was first applied to beneficial use) October 24, 1903

A claim is not acceptable on a ground-water source with a priority later than March 25, 1963 or on a surface-water source with a priority later than May 20, 1971. An exception to this rule is that a claim may be filed on domestic use from a ground-water source.

- (5) A) Point of diversion: (give location of point where water is diverted from its source)
SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 27 Twp. 11S Rge. 40E B. M. County of Caribou
 Additional points of diversion: _____

B) Describe means of diversion of water: (pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities; be as specific as possible. Spring box with orange berg pipe to private cistern.

- (6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

[illegible]

Total No. of acres _____

B) If the water is used for other than irrigation, fully describe that use, being as specific as possible: The water is used for domestic purposes for two families, 1 acre garden and stockwatering purposes for 200 cows and 100 calves.

- (7) If you are claiming water as a member of an organization, list name of organization: _____

NOTICE OF CLAIM TO A WATER RIGHT No. 13-4024

Notice is hereby given that
Jim W. Elsmore and Keith Bar-
tholome, Rt. No. 1, Grace, Idaho
have filed a claim to a water
right established by diversion
and application to beneficial use
of 0.14 cubic feet per second of
water from an unnamed spring
tributary to sinks with point of
diversion in the SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec.
27, T. 11S, R. 40E, B.M., Caribou
County.

The water is claimed to be
used from Jan. 1 to Dec. 31 for
domestic purposes for two fam-
ilies and stockwatering purposes
for 200 cows and 100 calves with
a priority of October 24, 1903;
the place of use is within the
SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 26, T. 11S, R.
40E, B.M.

Any exception to this claim
of water right may be filed with
the Idaho Department of Water
Resources, 1515 Lincoln Road,
Idaho Falls, Idaho, 83401.

IN THE MATTER OF:)

Claim to a Water Right No. 13-4024)

State of Idaho)

County of _____)

RECEIVED
AFFIDAVIT
MAR 10 1975
Department of Water Resources
Eastern District Office

_____ being first duly sworn,
deposes and says: We the undersigned do hereby file an exception to the water claim
of Jim W. Elsmore and Keith Barthlome filing to a water right of 0.14 cubic feet per
second of water from unnamed spring tributary to sinks with point of diversion in the
SE¹/₄NE¹/₄, Sec. 27, T. 11S, R. 40E, B.M., Caribou County.

This location has already been filed upon (Wayne Anderson, Keith Barthlome,
and Wawn S. Hogan), application No. 13-7064 for 0.20 cubic feet per second in 1973.
We feel that the location should be more clearly identified as to location; one spring
being on the west side of the creek which is the Wayne Anderson, Keith Barthlome,
and Wawn S. Hogan one, and the other spring on the east side of the creek, Jim W.
Elsmore and Keith Barthlome.

The creek we are referring to is the North and South Burton Creek which comes
down in a south easterly direction thru Keith Barthlome's ranch and runs into Bear
River. The Jim W. Elsmore-Keith Barthlome spring lies about 300 to 400 ft. east
of said creek and the Wayne Anderson, Keith Barthlome, Wawn S. Hogan spring is about
100 ft. west of the creek.

Thanking you in advance for your kind attention in this matter.

Wawn Hogan

DDF file

July 3, 1975

Dear Mr. Elsmore,

Further investigation of the aquifer contributing to your collection system coupled with a survey measuring the elevation of standing water in several augered holes (5'-6' deep) on both sides of the stream shows that water in the aquifer lying generally west of the stream is at that point at a higher elevation and undoubtedly contributing to all or part of the water found in your system.

Sincerely,

James S. McCloy

Re: Claim No. 13-4024

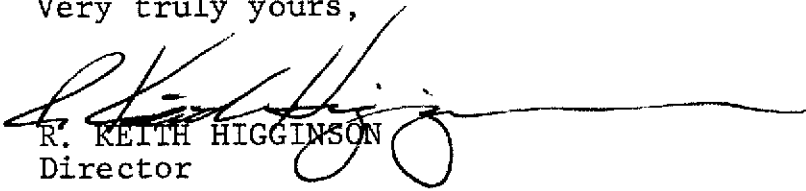

Dear Keith:

Thank you for your recent letter giving me your views concerning the situation involving Mr. Elsmore and Mr. Bartholome and their dispute over the springs.

Unfortunately, the Legislature, a few years ago, did not act on a bill which would have given us authority to arbitrate disputes of the type which you mention in your letter. We therefore have no authority to make a decision based upon the information you have given me, and the only present recourse may be to have the matter reviewed by the District Court. However, if the facts are as recited in your letter, it would appear that Mr. Elsmore has a prior right to water from the spring which is being affected by diversion works being constructed by others. If that is the fact, those persons constructing the new collection system have an obligation to provide him with water, probably at no cost to him other than the equivalent of what it would have cost him to maintain the original system had they not interfered with it.

I'm sorry that we cannot provide you with any direct assistance in this matter, but would appreciate being kept advised of the future progress of discussions concerning it.

Very truly yours,

R. KEITH HIGGINSON

JUN 4 1975

Department of Water Resources
Eastern District Office

Mr. Jim Elsmore
Grace, Idaho
May 24, 1975

Dear Jim:

Your domestic water supply and that of Mr. Wawn Hogan's is fed by an aquifer on Burton Creek that is a result of ancient stream and lake deposits. Burton Creek has cut through these deposits while depositing sand and gravel over the consolidated clays and silts.

Water travels through the layers of these porous deposits and exists where they are exposed. Your aquifer is fed in a small part from Burton Creek, as proved by the fact that when Burton Creek dries up in the late summer your spring continues to run. The water seeps through the layers of sands and enters through porous soil to the layer of sands and gravels, and since the consolidated clays and silts are not as porous, the aquifer acts like a reservoir. Throughout the year the amount of water in the aquifer depends on the inflow. As the water rises in the reservoir it will exit through any weak spot, your spring or excavation.

The present water level in the reservoir is high enough to allow natural irrigation of your field. If more water is extracted from the aquifer than is supplied, the water table will drop until irrigation will be necessary.

If Mr. Hogan's collection system does not lower the water table, then any increased collection system you install will. Of course, if Mr. Hogan was to put his excess water back into the aquifer rather than into Burton Creek the situation would improve.

I am positive that Mr. Hogan's spring is in the same aquifer as yours and that the present aquifer will not support both collection systems and keep your pasture as productive as it has been.

Respectfully yours

Dear Keith:

It has been quite some time since we last conversed but I trust you still remember me.

I have been asked by Jim Elsmore to review some construction that has taken place in the vicinity of some springs that have furnished domestic and cattle water for his home and the home of Keith Bartholome. The springs are recorded as being located in the Southeast 1/4 of the North-east 1/4 of Section 27, Township 11 South, Range 40 East, B.M.

The facts, as close as I can determine, are as follow:

1. The springs in this area have served the home in which Jim Elsmore lives for over seventy years.
2. In 1945 additional water was collected from a small pond located westerly of Mr. Elsmore's source and piped to Keith Bartholome's and Wawn Hogan's properties for domestic and cattle watering purposes.
3. In 1973, Keith Bartholome, Wayne Anderson and Wawn Hogan filed an application No. 13-7064 to divert 0.20 cfs from this spring area. Mr. Bartholome, Mr. Anderson and Mr. Hogan proceeded to construct a collection works by installing approximately 160 feet of perforated pipe. It went from an existing collection box in a westerly and northwesterly direction around the small pond formerly used as a water source and toward a patch of willows. Mr. Bartholome is involved in both water systems.

MICROFILMED

4. According to Mr. Elsmore, he did not protest their filing because he was of the opinion that there was adequate water for all.

5. The construction of the collection works by Mr. Bartholome, Mr. Anderson and Mr. Hogan has:

a. Apparently diminished the size of the pond previously used as a source of water.

b. Diminished the water in the springs used by Mr. Bartholome and Mr. Elsmore to the extent that Mr. Elsmore was completely without water and found it necessary to haul water for use within his home.

c. An overflow constructed by Mr. Bartholome, Mr. Anderson and Mr. Hogan is discharging 50 to 100 gpm into the small creek that traverses the property. This water was developed when the collection works was constructed.

Because the construction in the spring area diminished his source of water, Mr. Elsmore requested permission to connect to the collection works of Bartholome, Anderson and Hogan. Mr. Bartholome and Mr. Anderson gave permission but Mr. Hogan denied permission unless Mr. Elsmore paid part of the construction costs. This Mr. Elsmore is refusing to do because he is being required to install approximately two hundred feet of new pipe to intercept adequate water for his own use. Mr. Elsmore's concern is that he won't be able to locate adequate water without going over to and possibly intercepting the collection system of Bartholome, Anderson and Hogan. Mr. Hogan also wanted Mr. Elsmore to give up his priority on his water right. At present there is adequate water for all if the overflow water is directed into Mr. Elsmore's system, however, during the periods of low flow, the quantity could diminish to a point where the owners of the junior rights would have to recognize the senior rights. The problem is a practical one wherein water has been developed, some is going to waste, and an old source has been essentially dried up. It is also a personal one that has created considerable hard feelings in the area and requires the assistance of a disinterested party, such as your office, to make a determination.

Mr. Elsmore has contacted your representatives in Idaho Falls but they are not too responsive. They apparently are trying to mediate the issue. Whereas it is, in my opinion, an issue that requires a decision on water rights and the effect of the 1973 construction.

It is my opinion that:

1. The 1973 construction has intercepted the natural flow to Mr. Elsmore's spring and that corrective measures must be taken to re-establish the flow to Mr. Elsmore's spring.

5 May 1975

2. A law suit can be averted if your office will take positive action.

3. The overall well being of the people involved and the area in general will best be served by prompt action.

May I suggest that you request the assistance of the State Geologist in analyzing the problem.

Thanking you in advance for your consideration.

Respectfully,

HANSEN & ASSOCIATES, INC.

RE: Claim to a Water Right No. 13-4024

Mr. Jim W. Elsmore
Mr. Keith Barthlome
Route #1
Grace, Idaho 83241

Gentlemen:

This is to notify you that the Department has received your claim to a water right and the three other documents which you submitted for inclusion in your claim file. The Department will commence advertising your claim on February 20 and February 27, 1975.

Enclosed you will find departmental receipt No. 4089 in the amount of \$10.00 for said claim.

Very truly yours,

RONALD D. CARLSON
Acting District Engineer

Department of Water Resources
Eastern District Office

Formal Protest

I the undersigned having interest in ordinary & domestic water rights, dating back to 1903. Do hereby file protest to water filing and new use right of 90 gal. per minute made by Anderson Borthome and Hogan for following reasons

1. Section 42-222 Idaho Code (Point of Diversion)
By changing point of diversion and using a collection system for underground water has intercepted water which belongs to the undersigned; which has caused loss of water flow and cessation of flow during part of the season.

2. Waste water is not being regulated but has been allowed to run back into Bear River for past 12 months. When in all probability if such over-flow water was placed back into ground no shortage might exist to undersigned.

3. All parties concerned in water dispute have been negotiating periodically for 5-6 months without reaching an agreement to solve shortage.

4. That their development has jeopardized our senior right and chances for future development.

5. Section 42-203 Idaho Code. That this new use has reduced the quantity of a senior water right which has been in use since 1903.

6. It is questionable if water right & development was made in good faith with due consideration to all parties, since they were cautioned on the length of collection system, and asked not to go too far.

20 gal per minute

DEC 16 1974

Department of Water Resources
Eastern District Office

1. Sec 42-239c Idaho Code.

This section indicates to me that I have
a right of recovery to water which I have
lost, by parties who changed point of diversion
and acquired new use permit.

Sincerely yours

Jim W. Elenore

Mr. Keith Barthlome
Route #1
Grace, Idaho 83241

Dear Mr. Barthlome:

Please find enclosed your claim to a water right, your check No. 92-223 in the amount of \$10.00, the other documents which you submitted and also, an additional claim form which we have taken the liberty to retype from the information submitted on the original claim form. We are returning your claim because the map in Item 3 and the description in Item 6 did not agree. Since a claim to a water right is evidence that you wish to have available to submit to the court if the need arises, the claim and all documents submitted as supporting evidence must be in the form prescribed by the court. Therefore, rather than the letters that you submitted from Mr. Pond and Mr. McCloy, you should submit their statements in affidavit form and these forms must be signed in the presence of a Notary Public.

Please review the retyped form and if you feel it correctly describes your use rights, it will again be necessary for you and Mr. Elmore to sign the form before a Notary Public before returning it with the \$10.00 filing fee for processing.

If you have any questions, please contact us.

Very truly yours,

RONALD D. CARLSON
Acting District Engineer

Claims

RECEIVED

Ronald P. Carlson

RECEIVED

DEC 16 1974

Department of Water Resources
Eastern District Office

Enclosed is use permit or claim to water right of Oct. 24 1903 of Barthlome + Edmore.

Also enclosed is statement of Alma Pond of history of right, a statement by James McClellan Hydrologist and Formal Protest, which was previously submitted.

Please make photostatic copies of each and file with claim to water right.

Sincerely yours
Jim W. Edmore

P.S. Please return all document for personal use.

November 25, 1974

Mr. Jim W. Elsmore
Route #1
Grace, ID 83241

Dear Mr. Elsmore:

Please find enclosed your claim to a water right and the protest against Permit No. 13-7064 in the name of Andersen, Hogan &/or Barthlome.

The claim was not in complete form and the statutory filing fee of \$10.00 was not included. We have taken the liberty to retype the claim from the information submitted on the original form. Please complete Item 5a, Item 6a & 6b before returning the retyped document. Also, you will need to sign the form before a Notary Public.

The protest which you submitted against the above mentioned permit cannot be accepted because the protest period has lapsed and the application has been approved. However, if you wish to file an exception to the claim submitted by Mr. Hogan, then it must be filed in affidavit form and signed in the presence of a Notary Public, pursuant to Section 42-225b of the Idaho Code. A copy of the exception will be sent to the claimant and a copy included in the claim file. The Department will take no action on an exception but will have it available if it is ever needed in a court proceeding.

Please return the retyped claim with the filing fee of \$10.00 and we will be happy to commence processing. If we may be of further assistance, please feel free to contact this office.

Very truly yours,

RONALD D. CARLSON
Acting District Engineer
