WATER RIGHT LICENSE

License of Water Right No. R-1106/13-2302 Priority Jan. 9, 1962 Amount 730 acrefeet

THIS IS TO CERTIFY, that Preston Whitney Reservoir Company
of Preston, Idaho, has complied with the terms and conditions of Permit
No. R-1106/13-2302 issued pursuant to Application for Permit dated January 9, 1962,
and has submitted proof to the Department of Water Resources on February 22, 1973,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the storage of 730 acre feet of water from the Cub River,
tributary to the Bear River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Storage for Irrigation	from <u>Jan. 1</u> to <u>Dec. 31</u>	at <u>n/a</u> cfs and	<u>730 acre feet</u>
	from _____ to _____	at _____ cfs and	_____
Irrigation	from <u>April 1</u> to <u>Nov. 1</u>	at <u>6.80</u> cfs and	<u>2,282 acre feet or</u>
	(both dates inclusive)		<u>3.5 af per acre</u>

Subject, however, to the condition that no more than 730 acre feet of water be stored at any one time, and
that the amount of water so stored and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
3.5 per acre acre feet per year, said waters to be diverted from the reservoir at a point within

Re: Cub River storage water diversions
Water right no.s 13-2291, 13-2298 & 13-2302

Dear Mr. Swainston:

The Bear River watermaster has informed the department that the Preston-Whitney Irrigation Co. may have exceeded its Cub River storage water diversion allotment for the current year.

I have reviewed the above Preston-Whitney Cub River storage rights with the Bear River watermaster, Pete Peterson. Mr. Peterson receives diversion data under these rights from the Cub River watermaster. According to the rights in our records, the total annual volume allotted under the three rights is 6,492.5 acre-feet. The diversion data received by Mr. Peterson indicates that the amount of water diverted from the Cub River under these rights during the current non-irrigation season is significantly greater than 6,492 acre-feet.

Please be advised that if the storage capacity of the Irrigation Company's reservoirs is greater than 6,492.5 acre-feet, then the Company should file an additional application to divert additional volume from the Cub River. Storage rights from other sources tributary to the same reservoirs do not account for additional diversions from the Cub River.

If you have questions regarding this matter and/or questions regarding the Company's water rights, please contact me directly at 327-7864. I would encourage you to first discuss this matter with both the Bear River and Cub River watermasters.

Respectfully,

Gentlemen:

A representative of this Department has made an examination of the works covered by your Permit No. R-1106/13-2302 and has found the following:

Amount of water that can be recognized as beneficially used under Idaho law: 730 acre feet

The maximum quantity diverted shall not exceed 2,282 acre feet, or 3.5 acre feet per acre, per year.

Point of diversion: (from the reservoir at a point within) NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 20, Twp. 15 S, Rge. 40 E, B. M., Franklin Co.

Beneficial use: Storage and irrigation of 1,226 acres
(see enclosed copy of land list attachment)

Priority date established: 1/9/1962 Source: Cub River

If you do not concur with these findings please contact us within 10 days, otherwise a water license will be issued as set forth above.

Gentlemen:

One of the conditions of approval of your water Permit No. R-1106/13-2302 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before March 5, 1973. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Gentlemen:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department; previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply them upon request at any time.

Gentlemen:

Under the terms of your Permit No. R-1106 you are required to complete your diversion works on or before March 5, 1967. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public, or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the said permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Dear Mr. Mockli:

Returned herewith is your application for permit to store Cub River water with receipt No. 30893 for \$5.50 filing fee for 730 acre feet per annum.

Water License No. 15883 was issued in 1928. The lands being irrigated have probably changed since then, and possibly there has been some change in the canals and laterals.

You should complete answers to all applicable questions from No. 8 to 20 inclusive.

Enclosed are three sketch map forms. Two have been completed as far as sections and townships, and one of the two shows Cub River, Wom Creek, reservoir and the lands irrigated as shown on maps in our office. Other sources indicate that the streams may not be shown correctly. Kindly complete two sketch maps in ink showing the canals, streams, diversions and lands to be irrigated.

Return the completed application within 60 days or this application will be forfeited, and new application and filing fee will be necessary.
