POINT OF DIVERSION

Permit No. G-29871

RECEIVED
AUG 11 1966

Department of Reclamation

Comes now Joseph H. Hedin
and represents to the State Reclamation Engineer of the State of Idaho:

That he is the owner and holder of Permit to Appropriate the Public Waters of the State of Idaho, No. G-29871.

That the point NE $\frac{1}{4}$ NE $\frac{1}{4}$ Sec 30, T. 13 S., R. 40 EBM of diversion is described in said Permit as being located:

That he now requests that the point SE $\frac{1}{4}$ SE $\frac{1}{4}$ Sec 19 T. 13 S., R. 40 EBM of diversion be changed to a point located:

That the reason for desiring to make such change is as follows:

Original point of diversion was in error due to typographical error.

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.

Dear Mr. Johnson:

In reference to your letter dated August 2nd, I wish to inform you that the original application was for 10 cfs but proof of filing was made on only 1 cfs, which you will note on the affidavits by the two witnesses and by the owner.

Water from well flows into Strongarm Irrigation District reservoir and becomes part of said Strongarm Irrigation District, as original pooling agreement was made by Strongarm Irrigation District stockholders.

Yours very truly,

Joseph C. Hedin

Re: Permit No. G-29871

Mr. Joseph H. Hedin,
Rt. #3,
Preston, Idaho.

Dear Mr. Hedin:

I made an inspection of the above numbered permit on July 20, 1966. You were not at home that day.

Your permit shows the point of diversion to be in the NE1/4, Sec. 30, T. 13 S., R. 40 E. I find the point of diversion to be in the SE1/4, Sec. 19, T. 13 S., R. 40 E.

Since the point of diversion is located wrong, it will be necessary for you to amend the point of diversion and re-advertise for 2 consecutive weeks at your expense. The necessary forms are enclosed. There is a \$1.00 fee for the amendment to accompany the returned form.

I found your pump only produces 1.04 cfs. Your permit shows you filed for 10.0 cfs to irrigate 800 acres of land. To get the water to the land, it is necessary for the 1.04 cfs to flow down approximately 1 3/4 miles of creek channel through a large reservoir and several miles of large canals.

Please inform us how you want to handle the allocation of the 1.04 cfs. To what land should it be apportioned to? How is the loss accounted for through the creek and canal channel and through the reservoir? It is important we know the answers to the above questions.

Very truly yours,

Gentlemen:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- ~~29871~~ are due not later than **July 3, 1966**

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated -- all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Very truly yours,

CARL E RAPPAN

Application No. G-37825

Mr. Joseph C. Hedin
Route 3
Preston, Idaho

Dear Mr. Hedin:

We returned the application for permit on June 14, 1961 requesting that you complete the maps and No. 12 of the application and to return the application within 60 days for processing.

We received some information from J. N. Larson Company in regard to land owned by different men. That is entirely inadequate.

Kindly complete the application as requested and return to this office.

Very truly yours,

GEO. N. CARTER
State Reclamation Engineer

Dear Mr. Hedins:

This letter certifies that you have this day filed an application for permit to appropriate ten (10) cubic feet per second of subterranean water. The location of the wells is in the NW1/4, Section 30 and NE1/4, Section 36, both in Township 13 S., Range 40 E., B. M. The water appropriated is to be used for irrigation of lands in Sections 6, 7, 8, 17 and 18, in Township 13 S., Range 39 E., B. M.

The routine of processing an application for permit to appropriate subterranean waters requires some little time inasmuch as it must be approved by this office, signed by the Governor and the Secretary of State and then recorded upon the records of this office. Due to the fact that this cannot be accomplished except through regular routine I am giving Mr. Hedins this letter.

The application for permit is in sufficient form to justify its approval when all the routine procedure has been accomplished. This letter you may take as notice the application for permit will be approved.

Very truly yours,

GEO. W. CARTER
State Reclamation Engineer
