Application for Amendment ✓  
POINT OF DIVERSION  
Permit No. G-28839

Comes now HERBERT WILLIAMS and represents to the State Reclamation Engineer of the State of Idaho:

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. G-28839

That the point of diversion is described in said Permit as being located:  $SE\frac{1}{4}SW\frac{1}{4}$ , Sec. 5;  $NW\frac{1}{4}NW\frac{1}{4}$ , Sec. 8, T. 16 S., R. 38 E., B. M.

That he now requests that the points of diversion be changed to a point located:  $SE\frac{1}{4}SW\frac{1}{4}$ , Sec. 5; 2 wells in  $NE\frac{1}{4}NW\frac{1}{4}$ , Sec. 8, T. 16 S., R. 38 E., B. M.

That the reason for desiring to make such change is as follows: test well in  $NW\frac{1}{4}NW\frac{1}{4}$ , Sec. 8 was a dry hole.

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.

Signed at Preston, Idaho, this 20 day of February, 1961.

Dear Mr. Tappan:

I noticed a different Permit No. (G-29553) in your letter dated January 1, 1966. Am I required to submit Proof of Completion of Works after a certain number of years have lapsed? *I have my license also*

I typed the wrong number in form no. 36 then erased, can you type the correct No.?

I left the date off also, from the form No. 36. Your letter was placed in my letter file and I am a little late in mailing these forms. I certainly hope this lateness is not too serious.

Sincerely,

*Herbert M. Williams*

Dear Mr. Williams:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the Preston Citizen, all submitted in proof of completion of works and beneficial use on Permit No. G-28839.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,

Re: Permit No. G-28839

Mr. Herbert Williams,  
Worton, Idaho.

Dear Mr. Williams:

This acknowledges the Notice of Proof of Completion of Works and Application of Water to Beneficial Use under Permit No. G-28839. The proofs are to be made at 5:00 o'clock P.M., on the 10th day of March, 1962, before Rachael Lett, Worton, Idaho, Notary Public.

As of this date we have mailed the Notice to the Preston, Idaho Citizen, with instructions to publish it once a week for four consecutive weeks prior to the date set for final proof then mail the affidavit of publication and statement of costs to you.

It is important that the enclosed depositions be executed by you and two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder, at the place, on the date, and at the time and before the Notary, as advertised. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, the Notary's seal has been placed on each and that all depositions, (holder and two witnesses) are being returned. Also be sure to enclose the Affidavit of Publication.

Very truly yours,

RE: Permits No. G-28839, G-29553

Herbert N. Williams  
Weston, Idaho

Dear Mr. Williams:

We received your letter of January 8 in regard to completion of your well and possible trouble with springs.

Enclosed are forms, with instructions, to be completed prior to making the proofs of completion of works and beneficial use of the water.

You indicate you are using 40-8 gallon sprinklers or about one cubic foot per second of water. Permit No. G-28839 claims 1.4 c.f.s. and should be the one you use at this time. Your other permit could be used later if you develop additional water.

Your right, and also the right of your neighbors, to divert subterranean water is good only insofar as you do not deplete water claimed by a prior right.

Determination of effect of withdrawal of water from a well or wells is a tedious job of measuring the water flowing from the spring prior and while one well is being used. Then the second well is checked, etc.

Record of depth to water in the wells should be kept during the test period as well as the flow from the wells. The time necessary would depend upon the number of wells involved. It could mean that the wells could not be operated for a considerable time. The tests could be made prior to the irrigation season. Any offending wells could probably divert sufficient water to the company to offset any loss of water in the spring.

Very truly yours,

Dear Mr. Williams:

Your application for permit with amendments to point of diversion and land list under Permit No. G-28839 have been received with check for \$6.25.

The application will be approved for 67 miners inches. The filing fee of \$5.25 is included in your check.

The points of diversion and the land list on Permit No. G-28839 are amended to the same shown on your new application, making a total of 137 miners inches for 137 acres of land. There is a fee of \$1.00 for each amendment. As your check was for \$6.25 and the fee for the new application is \$5.25, you owe this office \$1.00 which you may remit.

The amendments will be returned as soon as they have been recorded.

RE: Permit No. G-28839

Herbert N. Williams  
Weston, Idaho

Dear Mr. Williams:

Returned herewith is your map to accompany Permit No. G-28839 with forms.

Permit G-28839 shows the amount of water as 1.4 cubic feet per second or 70 miner's inches to irrigate 70 acres of land. That is the maximum amount of water that can be shown on the license. If you develop additional water another permit will be necessary for you to have a right for all water developed.

You may amend the point of diversion on your permit by completing the enclosed form. There is a fee of \$1.00 for recording the amendment. On the amendment you would show 2 wells in the NE $\frac{1}{4}$ NW $\frac{1}{4}$  of Section 8 and 1 well in the SE $\frac{1}{4}$ SW $\frac{1}{4}$  of Section 5 as the amended points of diversion.

You may amend the land list on your permit by completing the enclosed form. In the description you would show a fraction of the NE $\frac{1}{4}$ SW $\frac{1}{4}$ , fraction of the SE $\frac{1}{4}$ SW $\frac{1}{4}$  of Section 5; NW $\frac{1}{4}$  of Section 8, Township 16 South, Range 38 East, making a total of 178 acres. There is a fee of \$1.00 for recording the amendment. Instead of amending the land list, you may want to apply for a new permit to cover the land you recently purchased.

Dear Mr. Carter:

Will you please send me the necessary papers to file for another permit to drill a well for irrigation purposes?

Since I filed for permit No. G 28839 dated July 8, 1961 I have had to change the location of my well. We drilled a test hole in the NW  $\frac{1}{4}$  of the NW  $\frac{1}{4}$  of Section 8 which turned out to be dry. We drilled hole (No. B) 100 ft. deep and put a 4" casing in it. (this is located in the NE  $\frac{1}{4}$  of the NW  $\frac{1}{4}$  of Section 8) I would like to drill another hole near this same location (No. C) and put a 10" casing. From hole No. C, the well driller, Mr. Charles Gardner from Malad, Idaho, said I could pump 450 GPM. with a draw down of 40 to 50 ft.

Last fall I purchased the rest of <sup>the NW  $\frac{1}{4}$  of</sup> Section 8. My farm now = 178 A. I believe that with the water from well No. C -- 450 GPM and the water from well No. B - 150 GPM and the water from the open hole (No. D) in SE  $\frac{1}{4}$  of the SW  $\frac{1}{4}$  of Section 5 I will have enough to water my farm. (along with 53 shares of The Weston Creek Irrigation Co.)

Will you please advise me in this matter? Thanks.

Sincerely,

*Herbert N. Williams*

Dear Mr. Williams:

Enclosed are two forms 3, application for permit to appropriate subterranean water with instructions.

One application, only, is needed for one or more wells to irrigate one farm or for more than one farm if the wells will furnish water to all the land. Separate farms and wells should have separate applications.

Proof of Completion of Works and Beneficial Use of the water must be made on or before five years after the permit is approved and one-fifth of the total work must be completed in two and a half years.

The application must show the amount of water claimed from the well or wells. More than one well location can be shown under "4" by using the space above or below the first line.

Dear Sir:

Will you please send me the necessary papers to fill out so that I may file on a well for irrigation purposes?

A map giving and idea of the location of the Well marked AX is enclosed. The description reads as follows:

Located in the South West  $\frac{1}{4}$  of Sec. 5, in T.P. 16, R. 38 E B. M. Boise. , which is 1810 feet east of the section corner and 565 feet north.

In the near future ~~is~~ I wish to drill two more wells or test holes, will I have to obtain a separate permit? if so it would save time if you also enclosed papers for these.

Will the filing also have to include the amount of water to be taken from the well?

Yours very truly,
