Mr. Lovell J. Mendenhall
Secretary of Water District #13s

Grace Fish Hatchery
Caribou County

Dear Mr. Mendenhall:

In explanation of the Department's operation and construction of an improvement at its Grace Fish Hatchery and fish rearing ponds which led to a protest by the water users of Whiskey Creek District #13s on the Department's use of the waters of Whiskey Creek, the Department considers the new improvement to be an integral part of its Grace Fish Hatchery facilities and necessary for its orderly operation.

We wish to assure you that the Department's use of the waters from the Big Spring of Whiskey Creek will conform with that use permitted by water use Permit #20271 and that all of its Hatchery pipelines and waterways will be metered and weired to determine maximum water flow.

The building which is 48' X 24' of which one half is for storage has a sidewalk area of 396 feet and will have a vehicle use area of about 2700 square feet. Both the building and vehicle use areas have or will replace that amount of existing lawn area. We expect that this savings of lawn water needs will exceed the domestic water needs of the Department's new building during the irrigation season.

We hope that this explanation of the Department's Grace Hatchery operations meets with the accord and approval of the water users of Water District #13s.

Sincerely,
