Re: Permit No. 16021-Daniel Gilbert

Mr. A. J. Dawson
Weston, Idaho

Dear Sir:

In checking the affidavit for proof of completion of works under the above numbered permit, we find that the lands to be irrigated do not agree with the permit. The permit gives 25 acres in the NW $\frac{1}{4}$ NE $\frac{1}{4}$, 25 acres in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ and 20 acres in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 20, Twp. 16 S., R. 39 E., B. M., making a total of 70 acres for which permit was granted for 1.4 second feet of water, being an inch to the acre. The affidavit is returned herewith for correction as to the lands to be irrigated as shown under paragraph 8 of the blank.

If you desire to make a new filing for the additional water mentioned I would suggest that you relinquish your permit and include the entire amount, 3 second feet, in your new application, but in order for the permit to be granted for 3 second feet you would be required to show that you intend to irrigate 150 acres instead of 70 acres.

When proof of beneficial use of water is made under a permit the license is issued for only the amount of water that has actually been used upon the land, allowing 1 inch per acre.

The check for fees in the sum of \$5.00 is returned with the affidavit for proof.

If you desire to continue the proof under this permit for the 1.4 second feet the description of the land would have to be corrected and the affidavit returned to us, together with the check for fees.

W. G. SWENDSEN
