All the foregoing reservations of jurisdiction shall extend after the term at which this decree is entered, and during any subsequent term prior to January 1, 1924, at which time, or at such earlier time as the court may determine these matters, this decree shall be closed. In all other respects this decree shall be final.

The court further retains jurisdiction, however, at all times, and from time to time, to make all reasonable rules touching the manner of diverting, measuring and distributing the waters, and the devices to be installed and used for such purposes where it may be impracticable to fully comply with the terms of this decree, and to direct that the parties keep accurate and detailed records of the amounts of water diverted, and to require reports to be filed from time to time of the amount so diverted, and generally to make such orders as may be found reasonably necessary to give effect to the decree, and to appoint commissioners or water masters to make distribution in accordance with its terms, and to punish the parties hereto, their officers, agents and employes, and their grantees and successors in interest, for any violation of the provisions thereof.

Done in open court this 14th day of July, 1920.

MEMORANDUM

TO: FILE NOS. 13-00822 & 13-00823

FROM: PAM SKAGGS/STATE OFFICE

SUBJECT: ADJUSTED TRANSFER RECOMMENDATIONS
TRANSFER NO. 4734

DATE: March 26, 1996

=====

The applicant has corresponded with the state office twice regarding the previously recommended draft transfer. Mr. McGregor stated that no abandonment of the rights should occur through approval of this transfer, rather that the application describes current practices and all the water is required.

Today I received information submitted by Mr. McGregor that identifies all the irrigated acres on the originally described parcel of land. He didn't know how the error in acres occurred, but confirmed the total irrigation of 91.3 acres. This is more closely related to the originally decreed 110 total acres under these rights. The transfer was correct in all except the number of acres within each QQ and will be forwarded for approval with the adjusted acres.

Season of use and diversion volume were adjusted to current standards. With 91.3 total irrigated acres, only a small portion of the combined rights is in excess of 0.02 cfs per acre, 0.37 cfs, that is designated for conveyance purposes only. Combined right limits are identified as 2.20 cfs, 319.6 afa and irrigation of 91.3 total acres.

91.3 acres x 0.02 cfs = 1.83 cfs
2.20 cfs - 1.83 cfs = 0.37 cfs

Other recommended conditions include watermaster control, measuring device/lockable controlling works, irrigation overlap, right-of-way, permissible place of use limits and standard transfer conditions.

Dear Ms. Skaggs,

Thank you for your information concerning our water diversion transfer question. I don't know why but I didn't pick up on an incorrect number mentioned in the information and I apologize for the oversight. The 50 acre number is simply not correct. I am enclosing copies of maps obtained from the SCS office as well as tax notices with legal descriptions of irrigated agricultural land belonging to the original decrees. You will find the total acreage to be much closer to 100 than to 50. I hope this is the kind of proof you need to help clarify the situation. Again, thank you for your help and please keep us informed of any other things we can do to help you.

Sincerely,

Reed McGregor

RE: Transfer No. 4734
Water Right Nos. 13-00822 & 13-00823

Dear Mr. McGregor:

I received your letter of 03-07-96 today and appreciate your prompt response to my letter. You have provided more background and detail about the use of these water rights over the years, but no facts that would cause a change in the original recommendations of the draft approval. I would like to try and explain more about the transfer process and how the recommendations were reached.

When a transfer is proposed the right is investigated to confirm historical and current use of the water. Your application describes 50 irrigated acres.

Since the total number of acres irrigated has been reduced from 110, as decreed, to 50, the rate of diversion needs to be adjusted to show that less water is being diverted. The maximum rate of diversion that can be approved for irrigation of your 50 acres without further justification is 1.00 cfs or 450 gallons per minute. This adjustment should still allow you to irrigate the 50 acres as you have in the past.

I hope I have been better able to explain the recommendations that I previously sent to you in the draft approval. If you have further comment or information to submit that would influence the recommendation, please contact me within 10 days of your receipt of this letter. I will again withhold the transfer from further action to allow for your response.

If you require any further assistance, please contact me directly at 327-7943 and I will be happy to help you.

Sincerely,

A handwritten signature in cursive script that reads 'Pamela Skaggs'.

Department of Water Resources

Dear Ms. Pamela Skaggs,

We thank you for the work you are doing in our behalf concerning some water issues; however, we must have miscommunicated some ideas to you. Perhaps we don't understand the necessary legal language but whatever the case may be, we need to clarify some points. Our family has always maintained the highest respect for the privilege of using water. Our grandparents were early settlers in the area and the work they did building ditches and taking care of them has been extremely beneficial to us. In the 1960's, with the encouragement of the ASC-SCS groups, we were encouraged to change our irrigation practices. We followed their advice and went about installing sprinklers. In order to make their systems work using gravity, several people in our area, including us, rebuilt old ditches so a gravity head could be maintained. The old timers had several ditches which we have used only partially the last few years as it seemed more prudent to conserve a portion of the water by using it more efficiently in the sprinkler system. In the 1970's we approached the Idaho Falls office and worked on getting a "point of diversion" change. We left our information with a Mr. Kozlaski (I think it was) assuming he would help us. After not hearing from him for a long time, we learned he had left that employment and done nothing for us. We are not seeking any change in our water rights. We have not abandoned any water. All we are seeking is a simple change of point of diversion. The water is not being used on any property for which it was not decreed. We just need to be sure our original rights are protected and everything is in proper legal order. Thank you.

Sincerely,

Reed McGregor

RE: Application for Transfer No. 4734/Right Nos. 13-00822/00823

Dear Mr. McGregor:

I have just completed review of the above referenced application for transfer. The final recommendations are different than those described on the application and I am writing to explain these modifications.

These two decreed water rights were originally decreed to two separate land parcels with a specific number of irrigated acres associated with each and a diversion rate of 0.02 cfs per acre or a total of 2.20 cfs for irrigation of 110.0 acres.

The transfer application describes the current use of these rights on 50.0 acres and as delivered through the new diversion point. The total authorized rate of diversion for 50.0 acres at the decreed rate of diversion is 1.00 cfs. This amount of water can be fully supplied under Right No. 13-00822 with a portion of the right no longer needed. Right No. 13-00823 is not required to provide the full allotment of water associated with 50.0 acres.

Your application notes that the proposed place of use and system have been in place for the last 10 years. Any right not put to beneficial use for a period of 5 years or more is subject to forfeiture and abandonment statutes. The transfer approval will confirm your current use and clear our record of the portions abandoned over the years.

I have enclosed a draft of the proposed approval recommendations for your review. I will withhold the transfer from processing for 10 days to allow you to respond with any questions or considerations. If I do not hear from you within that time, I will assume you agree with the recommendation and forward the transfer for approval.

If you require any further assistance, please contact me directly at 327-7943 and I will be happy to help you.

Sincerely,

Pamela Skaggs

MEMORANDUM

TO: FILE NOS. 13-00822 & 13-00823

FROM: PAM SKAGGS/STATE OFFICE

SUBJECT: TRANSFER NO. 4734

DATE: March 4, 1996

=====

Transfer No. 4734 was filed to change and reduce the place of use, and change the point of diversion under Right Nos. 13-00822 and 13-00823 to reflect the current use of these rights.

Review of these rights as decreed reflects irrigation on separate adjacent land parcels, a specific number of irrigated acres on larger land bases, and an authorized rate of diversion of 1 inch per acre.

As Decreed:	13-00822	04-01-1883	60 Acres	1.20 cfs	(210.0 afa)
	13-00823	" " "	50 "	1.00 "	(175.0 ")
			110 "	2.20 "	(385.0 ")

The transfer describes a reduction in the total irrigated acres from 110.0 to a maximum of 50.0 acres irrigated under both rights on a portion of the originally described lands. The rate of diversion was adjusted proportionately, effectively abandoning all of Right No. 13-00823 and the portion of Right No. 13-00822 that is in excess of 1.00 cfs, or 0.20 cfs.

Recommended:	13-00822	04-01-1883	50 Acres	1.00 cfs	175.0 afa
	13-00823	" " "	0 "	0.00 "	0.0 "

Season of use and diversion volume were adjusted to current standards and the source clarified as solely Williams Creek. Recommended conditions include watermaster control, measuring device & lockable controlling works, irrigation overlap, right-of-way and standard transfer conditions.

RE: Notice of Application for Transfer No. 4734

Dear Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the applications in the Preston Citizen on November 23 & 30, 1995. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State Office Personnel will conduct a complete review prior to final processing of the applications and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

Harold W. Jones rb

Mr. McGregor:

Enclosed is an ownership map from Franklin County Assessor's office which shows the original place of use of the four rights you listed on your transfer application highlighted in yellow. You will need to get disclaimers, from each of the ten different owners shown, to proceed with the transfer.

Also another problem of excessive cfs has come up with this application. Fifty acres at one miners inch per acre (our standard maximum) is 1.00 cfs. This would be fulfilled by the 1871 rights. If including the 1883 rights, this would be excessive, especially for a pipeline and sprinkler system.

I would, in my evaluation, recommend to our Boise office to delete the 1883 rights. You can request the 1883 rights be removed before we process the transfer and avoid this part of the evaluation.

I think you should give me a call so we can discuss this further.

Sincerely,

Harold W. Jones
Water Resource Supervisor
