

MEMORANDUM

Date: April 04, 2006
To: Transfer 72030
From: kwilson
Re: Evaluation

This transfer proposes to combine the four points of diversion into a single well, and create a permissible place of use for these two water rights. The applicants will cap the existing points of diversion and install a new well within the legal description described.

Authority to File:

The applicants are the owners of the lands to which these water rights are appurtenant as evidenced by the enclosed warranty deeds.

Water Right Validity:

These water rights were decreed on 01/31/2005 in the on going Snake River Basin Adjudication. Forfeiture does not appear to be an issue.

Injury to other Water Rights:

No issues identified

Enlargement of Use:

The two water rights involved in this transfer are being combined into a single system, and ownership. The rights involved in this transfer were originally from a single water right that was split by ownership. This transfer will create a permissible place of use for both rights involved that will not constitute an expansion. No other issues identified.

Local Public Interest:

No issues identified.

Beneficial Use Conservation of Water Resources:

No issues identified.

Review of the application finds no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application
